**744 The University of Texas Health Science Center at Houston**

---

The University of Texas Health Science Center at Houston (UTHealth) submits the following Legislative Appropriations Request (LAR) for fiscal years 2018 and 2019 to the Governor's Office of Budget Policy and Planning and the Legislative Budget Board (LBB). The University of Texas System (UT System) is governed by a board of regents. The current members of the board of regents are included in the organizational chart. Giuseppe N. Colasurdo, MD is the president of UTHealth.

**OVERVIEW**

UTHealth is the state's most comprehensive academic health center and is Texas' resource for health education, innovation, scientific discovery, and transformative health solutions. UTHealth is headquartered in the Texas Medical Center, the world's largest medical center with 8 million patient visits annually. In addition to the Houston campus, we also have School of Public Health campuses in Brownsville, El Paso, San Antonio, Austin, and Dallas that collaborate with the health-related institution and/or general academic institution in that city.

Annually, we train and educate more than 5,000 future physicians, nurses, biomedical researchers, dentists, dental hygienists, public health specialists, and informaticians through our six schools: McGovern Medical School, School of Nursing, Graduate School of Biomedical Sciences, School of Dentistry, School of Public Health, and School of Biomedical Informatics.

We deliver high quality clinical care through more than 1.8 million outpatient visits annually. Faculty, residents, and students practice in a comprehensive patient care network that includes UT Physicians, UT Dentists, UT Health Services (School of Nursing), and the UTHealth Harris County Psychiatric Center. We also provide exceptional care in collaboration with our partners and teaching institutions: Memorial Hermann - Texas Medical Center (home to the nation's busiest level one trauma center), Children's Memorial Hermann Hospital, Memorial Hermann/The Institute for Rehabilitation and Research (TIRR), Harris Health System's Lyndon B. Johnson Hospital, and other hospitals and community clinics across the region.

**POLICY LETTER ADJUSTMENTS**

In response to a policy letter by the Governor, Lieutenant Governor, and Speaker that requires all agencies to trim four percent from their base appropriation levels, the LBB has designated \$1,475,932 as UTHealth's target reduction. Health-related institutions (HRIs) have limited options for reductions outside of formula funding, namely special items and a few general revenue line items.

UTHealth's special items are each critical to our mission and offer a good return on investment to the state. Specifically, these special items:

- Create pro-growth economic opportunities through commercialized medical products and devices;
- Offer educational experiences to our students that also improve the health of indigent patients;
- Limit outlays for governmental assistance by providing new medical interventions that return patients to work;
- Devise prevention strategies that keep healthcare costs low; and
- Fund research that improves the lives and health of Texans.

Leadership at UTHealth carefully reviewed each special item in an effort to respond strategically to required budget reductions. After considering each item's impact on the university, its students, patients, faculty, and staff, no one item stood out as a program that merited greater reductions in favor of another priority. Consequently, UTHealth's LAR recommends an across-the-board reduction to all eligible items.

Special Items:

## Administrator's Statement

8/9/2016 8:46:38AM

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

### 744 The University of Texas Health Science Center at Houston

---

- **Biomedical Informatics Research:** Funded by UTHealth's newest special item, the Biomedical Informatics Research Program seeks to make Texas the world leader for big data healthcare solutions. Even a small cut to this modest special item would hinder the efforts of the Center for Precision Health, the UT System-wide Clinical Data Network, and the recruitment of top data scientists and informaticians to Texas, among other projects.

- **Trauma Care:** Trauma is the leading cause of death for persons aged 1 to 44 years. Resulting injuries among survivors can cause permanent disability, limiting livelihoods and driving the need for government-funded services. This special item funds research at the Center for Translational Injury Research to invent the best devices and discover best practices in injury treatment. UTHealth trauma physicians run clinical trials and research studies in the busiest level-one trauma center and one of the busiest level-three trauma centers in the nation. Already, this special item has helped to push products into civilian and military trauma care. The Center has 19 active invention disclosures, and reductions will delay or even halt the translation of new discoveries to the clinic.

- **Improving Public Health in Texas Communities:** The UTHealth School of Public Health has six campuses across the state (Houston, Brownsville, El Paso, Austin, San Antonio, and Dallas) and produces more MD/MPH graduates than any school in the nation through agreements with medical schools across Texas. Additionally, agreements with schools of nursing, dentistry, social work, law, and business allow the School of Public Health to train professionals in subjects like genetics, prevention, epidemiology, healthcare management, and public safety. This special item funds critical health and public safety research and develops the public health workforce. A cut could limit the number of students trained, drive up tuition, and make the School of Public Health less competitive.

- **World's Greatest Scientist:** This special item assists with the recruitment of scientists and their subsequent genomic and proteomic research using biomedical informatics to look for biological clues to diseases, disorders, and other health impairments. Discoveries to date have saved lives, for example, by finding the gene responsible for aortic dissection and allowing preemptive surgery. Even a small cut would slow recruitment efforts and research at UTHealth's Institute of Molecular Medicine and the School of Biomedical Informatics.

- **Regional Academic Health Center – Public Health:** This special item, centered on the Brownsville Campus of the UTHealth School of Public Health, brings population health resources to the lower Rio Grande Valley, plays a key role in the region's 1115 waiver efforts, conducts research on chronic diseases that impact the predominantly Hispanic population, and actively collaborates with the new UTRGV Medical School. Even a small reduction in funding will hamper collaboration in the Valley and reduce services to some of Texas' poorest residents.

- **Heart Disease and Stroke:** This special item funds recruitment and research in metabolic and degenerative diseases, precision biomedicine, tissue engineering, and aging research and is co-located in the UTHealth Institute of Molecular Medicine with World's Greatest Scientist. To provide just one example of its impact, patient trials are ongoing at Memorial Hermann-TMC to use adult stem cells as a novel treatment for stroke. A reduction in this special item would slow recruitment efforts and research on heart disease and stroke.

- **Biotechnology Program:** This special item promotes biotechnology innovation and creation of public-private partnerships to commercialize UTHealth biotechnology. The program boasts 41 portfolio startup companies, more than 1,700 patent applications, 420 license or option agreements with private companies, and a successful Biotechnology Commercialization Center incubator currently serving nine companies. Cuts to this special item will hamper its efforts to move products to market, make Texas less attractive to scientists, and most importantly, prevent lifesaving discoveries from reaching patients.

- **Harris County Hospital District:** This special item provides much needed health care to indigent patients and supports graduate medical education (GME) efforts at Harris Health's LBJ General Hospital. GME slots are essential in growing Texas' physician workforce. Eighty percent of Texas medical students who complete their residencies in-state and 60 percent of residents recruited from out of state remain to practice medicine in Texas (one of the highest retention rates in the nation). LBJ

**Administrator's Statement**

8/9/2016 8:46:38AM

85th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

annually trains 480 medical students on clinical rotation (all of UTHealth's third- and fourth-year students) and 226 residents and fellows in GME programs. Any cut in funding will reduce the number of GME positions and diminish Harris County's capacity to provide indigent care.

- Service Delivery in the Valley/Border Region: This unique special item funds a mobile clinic in the lower Rio Grande Valley to serve indigent patients and immunize school-aged children in colonias and other areas of South Texas. This platform provides a training opportunity for UTHealth's fourth-year medical students and employs telemedicine capabilities to leverage the expertise of UTHealth physicians. A cut in funding will reduce the number of patients served, likely pushing them to more costly settings. In addition, teaching and research opportunities would decrease in an already underserved region.

- Institutional Enhancement: This special item supports innovative education and research programs not otherwise supported by formula funding. Any cut will lead to reduced programming for students and researchers.

Other GR/GR-D Appropriations:

- Dental Clinical Operations: Dental students and dental hygienists are required to have clinical experience with patients presenting with many different oral health issues. These patients, typically indigent, pay about one-third the cost of the private market rate for procedures performed by students and supervised by UTHealth faculty. The Dental Clinical Operations (DCO) line item is intended to offset some of the costs for dental supplies and the maintenance of 300 operatories (dental chairs) at the UTHealth School of Dentistry. Funding reductions would force the school to implement some combination of patient and student fee increases and reductions in education programs.

**POLICY LETTER EXCEPTIONS**

State leadership also exempted certain areas from the required reductions:

- Behavioral Health Exception: As described in Schedule 9, the Psychiatry and Behavioral Sciences Research special item funds mental health and substance abuse research. UTHealth requests a baseline of \$12,000,000 for fiscal years 2018 and 2019, equivalent to FY16-17 levels.

- Debt Service Exception: For Tuition Revenue Bond (TRB) retirement, UTHealth requests a baseline of \$37,499,622 for fiscal years 2018 and 2019, \$6,192,392 above the FY16-17 biennium. Because only the second year of the TRB debt service authorized by HB 100 was funded in the current biennium, the baseline request represents an increase.

**SIGNIFICANT CHANGES IN POLICY, PROVISION OF SERVICE, and EXTERNALITIES**

UTHealth and the State of Texas are facing significant challenges, including:

- Reductions in federal research budgets;
- Ongoing and new federal healthcare challenges; and
- Increasing demand for a healthcare workforce, concurrent with a decline in the state's proportional contribution to health professional education.

Last year's modest increase to the National Institutes of Health (NIH) budget is offset by flat or reduced budgets in previous years. Consequently, growth in biomedical

---

**744 The University of Texas Health Science Center at Houston**

---

research has fallen behind other countries that are investing heavily in academic research. Without increasing investment in NIH extramural research, national success rates on NIH grant applications will continue to plummet, discouraging young, bright students from beginning a career in biomedical research. On average, a scientist receives his or her first ROI grant (usually an investigator's first big grant) at the age of 42. UTHealth has had to find funds to "bridge" young, talented researchers' work between grants until they are sustainably funded by NIH or another entity.

Funding challenges also exist in the provision of healthcare services. There are ongoing concerns with insurance plans in the Affordable Care Act's federal exchange that exclude academic medical providers and/or some of our teaching hospital partners as in-network providers.

Uncertainties persist around Texas' 1115 waiver and the Network Access Improvement Plan (NAIP) as the Center on Medicare and Medicaid Services (CMS) determines their fates. If current funding levels are not sustained, UTHealth will be forced to shutter innovative programs designed to improve health outcomes and reduce costs. Even programs developed in partnership with Medicaid Managed Care Organizations (MCOs) with the goal of reducing costs, such as our sickle cell clinic, will be discontinued, leaving pediatric patients without a specialized medical home.

Texas' healthcare workforce shortage is well documented. Texas ranks 42nd among states for patient care physicians per 100,000 population, 47th for patient primary care physicians, and 48th for active patient care general surgeons.

In response, medical schools have increased enrollment by 34.5 percent since 2004 (not including Dell and UTRGV), created new GME slots, and provided student incentives. Unfortunately, these efforts have not kept pace with Texas' booming population.

Similar trends exist across healthcare fields, including nursing, where Texas ranks 43rd in the number of registered nurses per 100,000 population, and dentistry, where Texas ranks 44th, despite Texas dental schools' superior track record of producing graduates that remain in-state.

**FUNDING PRIORITIES AND LEGISLATIVE APPROPRIATIONS REQUEST FOR FY 2018 AND FY 2019**

The UTHealth FY 2018-2019 LAR was developed with the goal of maintaining and enhancing our ability to lead the state in educating an increasingly sophisticated and integrated healthcare workforce to meet the demands of a rapidly growing population, as well as to pursue research opportunities what will improve Texans' health. The return on this investment is significant: new companies and better jobs in Texas, a better educated workforce, an enhanced biomedical research infrastructure, and clinical care that is second to none.

Our request, however, is not made in a vacuum, and we appreciate the budget pressures the Legislature will face in 2017. Despite infrastructure needs and the promise of new programs, we have eliminated several requests from last session's LAR and will focus on a few high-priority issues. Compared to our previous LAR, we have reduced our Article III exceptional item requests by 45 percent (93 percent if TRBs are included).

The following paragraphs describe our funding priorities for the FY 2018/2019 biennium

**UTHealth Appropriations, Article III**

**1. Exceptional Item Request for the Women's Health Education and Research Center.**

UTHealth requests \$9 million/year to build a collaborative center that will recruit top talent, conduct groundbreaking research, and educate a well prepared workforce to

---

**744 The University of Texas Health Science Center at Houston**

---

meet the health needs of Texas women. With this funding, UTHealth will leverage its capabilities in clinical and bench research, demographic and epidemiological analysis, big data analysis, and education to make discoveries, translate them to practice, and teach them to tomorrow's workforce. Our goal is a collaboration among our six schools, with our neighbors in the Texas Medical Center, with state agencies, and with other institutions of higher education to:

- discover cutting-edge treatments to combat the leading threats to women's health;
- develop and test innovative practice strategies to maximize the quality and cost-effectiveness of care;
- identify cost-effective preventive health measures to reduce women's health risks;
- study and implement evidence-based strategies to reduce the adverse health impact of medical co-morbidities and gynecological conditions on minority populations;
- target emerging threats to women's health like the Zika Virus;
- expand education and training programs for women's health care providers; and
- build on existing clinical research infrastructure to expand the patient safety coordinating center for women's care and research.

**2. Biomedical Informatics Instruction and Operation Weight Adjustment**

Currently, biomedical informatics is incorrectly categorized as "Allied Health" and therefore receives the lowest weight (1.0) for the Instruction and Operations formula rate. UTHealth requests the addition of a new, separate weight of 1.750 that more accurately reflects the cost of operating a biomedical informatics program. In other states, bioinformatics programs exist within medical schools, and our lower formula funding weight puts Texas at a disadvantage in national and international competition for biomedical informatics faculty and students.

**3. Dental Clinical Operations**

UTHealth requests that the DCO line-item funding for Texas' schools of dentistry be converted to a formula. Currently, there is no metric associated with the amount appropriated to each school of dentistry in this line item. The biennial appropriation to UTHealth (Houston) is \$1.33 million, UTHSC-San Antonio is appropriated \$3.45 million/biennium, and A&M-Baylor Dallas receives \$78,096/biennium. We propose converting the DCO funding to a formula based on patient visits to undergraduate dental students only (no faculty or graduate-level care) at a clinic owned by the school of dentistry. The proposed formula, which would cover the net cost to the school, is \$45 per visit and would require an additional \$8.9 million in DCO funding across the three schools.

Additional funding is necessary to create the new formula and would benefit students by keeping fees low and ensuring an appropriate mix of patients to fulfill graduation requirements. It would also benefit indigent patients by keeping fees low and expanding outreach efforts at schools of dentistry to improve oral health in underserved communities.

**4. Attract Top MD/PhD Students**

Add a rider to Article III, Special Provisions Relating Only to State Agencies of Higher Education to allow UTHealth, like UT Southwestern, to admit up to an additional 25 out-of-state MD/PhD degree students for a special program of clinical and research training. UTHealth's Cullen Grant for these students has matured, and in order to renew the grant and apply for the NIH's Medical Scientist Training Program (MSTP) grant, we must expand the applicant pool for this highly specialized program.

The Graduate School of Biomedical Sciences is a unique collaboration between UTHealth and UT M.D. Anderson Cancer Center where physician-scientists are in high demand. Out-of-state students, once recruited, must remain in Houston for their residencies in order to complete their Ph.D. Consequently, these new physician-scientists

---

**744 The University of Texas Health Science Center at Houston**

---

are more likely to remain in Texas. No additional funding is necessary for this request.

**MAINTAINING FUNDING FOR PROGRAMS**

**Article III Texas Education Agency and Article VII Texas Workforce Commission - Early Childhood Development Programs at UTHealth**

A critical component of UTHealth's McGovern Medical School, the Children's Learning Institute (CLI) directs numerous nationally recognized research and clinical programs, including the Texas School Ready! Project (TSR!), as well as multidisciplinary programs ranging from the science of neurodevelopment to research to identify the best therapies for children with autism. TSR! serves at-risk preschool-aged children and their teachers through shared resources between public and private early childhood education programs.

By launching CLI Engage, a comprehensive online professional development platform for public school pre-k and Head Start teachers in Texas, TSR! now reaches 119,031 at-risk children, 10,886 teachers, and 6,707 classrooms. This represents a significant increase from 2014, when TSR! served 48,097 at-risk children, 2,565 teachers, and 2,772 classrooms. This increase was accomplished without any additional state appropriations.

UTHealth requests current funding levels of \$3.5 million/year through TEA and \$11.7 million/year through the Texas Workforce Commission (TWC). UTHealth also requests continuation of our Early Childhood School Readiness Program Rider, which mirrors a TEA rider to facilitate the efficient provision of TSR! services to local communities.

**ARTICLE II, DEPARTMENT OF STATE HEALTH SERVICES APPROPRIATION - THE UNIVERSITY OF TEXAS HARRIS COUNTY PSYCHIATRIC CENTER**

The mission of the UTHealth Harris County Psychiatric Center (UTHCPC) is to provide inpatient care for major psychiatric disorders, workforce education, research, and community service. UTHCPC is funded in Article II of the DSHS budget under the Community Mental Health Hospitals strategy. Current contracts with DSHS and the local mental health authority do not cover the cost of operating the beds. UTHealth recommends an additional \$2,004,539/year above current appropriation levels to DSHS would fully cover operational costs across three contracts, which fund 165 acute care beds, 23 competency restoration beds, and six extended-stay beds. This funding would allow UTHCPC to continue its excellent care for Texans with mental illness.

**ARTICLE II, DEPARTMENT OF STATE HEALTH SERVICES CAPITAL NEEDS - UTHCPC**

UTHCPC is a 30-year-old acute mental health hospital that serves thousands of patients and trains hundreds of medical professionals every year. Consequently, capital funding is needed to make critical upgrades. DSHS' capital request on behalf of UTHCPC was not funded last session, but UTHealth continues to make progress in replacing significant infrastructure, including portions of the HVAC system, restrooms, life and safety improvements, and a redesign of unit layout to reduce patient violence and aggression.

Using funding from the Legislature, Harris County, and internal funds, UTHCPC has completed renovation of four of its 12 units, in addition to shared infrastructure (electrical equipment, generators, etc.). Approximately \$5.7 million is needed to complete renovation of all units. Available resources include \$1.45 million in internal funds, as well as \$2 million from Harris County. Additional capital funding of \$2.25 million is needed to complete the renovations by the end of FY 2018, which would

**Administrator's Statement**

8/9/2016 8:46:38AM

85th Regular Session, Agency Submission, Version I  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

allow UTHCPC to reopen the 21-bed swing unit that has been closed to facilitate ongoing renovations. UTHealth encourages the Legislature to consider appropriating capital funding to DSHS for this purpose.

Without this funding, completion will be delayed until 2021 or later, due in large part to a significant decline in revenue from third-party payers, which have historically subsidized the cost of infrastructure maintenance.

**UTHCPC EXPANSION TO A CONTINUUM OF CARE CAMPUS**

UTHCPC opened its doors to patients in 1986. Since that time, the population of greater Houston has increased by 79 percent. The closest state mental health hospital is hours away, and consequently, UTHCPC serves as the inpatient psychiatric facility for Harris County's indigent patients. Available capacity does not meet the community's needs, however, and the Harris County Jail is often referred to as "the largest inpatient mental health facility in the nation."

There have long been demands from the greater Houston community and its legislative delegation to expand mental health services for the region at UTHCPC. Additionally, over the most recent legislative interim, committees in both the Texas House and Senate have investigated ways to expand capacity across the state. In response to this local and state interest, UTHealth sought guidance from a broad array of behavioral health experts and has developed an innovative proposal to relieve demand for inpatient mental health beds by building a lower cost continuum of behavioral healthcare services. This new model would prevent readmissions, and would be less costly to construct and operate than a traditional inpatient psychiatric hospital. What's more, the Texas Medical Center has offered its support through the use of land adjacent to the UTHCPC for only \$1 per year.

As the Legislature deliberates on how best to solve the state's inpatient mental health capacity crisis, UTHealth recommends that this innovative proposal be among those considered for funding. The model would allow patients to access a full range of treatment options, delivered in an integrated manner with the Harris Center's outpatient services and the Harris County Jail Diversion Project.

**REQUIRED BASE REDUCTION OPTIONS**

The 10 percent Biennial Base Reduction Options schedule reflects an across-the-board 10 percent reduction for non-formula general revenue items. Similar to the impacts described in the 4 percent reductions, additional cuts will further exacerbate UTHealth's efforts to educate a well prepared healthcare workforce, improve the health of indigent patients, recruit and retain the nation's best medical and scientific minds, implement best practices that reduce the cost of health care, and fund research that improves the lives and health of all Texans.

**REQUIRED STATEMENT ON CRIMINAL HISTORY**

UTHealth's policy is to obtain state criminal history information on any candidate offered an appointment to a security sensitive position. All positions at UTHealth are designated as security sensitive. National data is also obtained for all non-faculty candidates for whom a social security number trace reveals out-of-state records and for all faculty candidates, as allowed by Government Code Sec. 411.094 and Education Code Sec 51.215. Criminal background information may not be released or disclosed to any unauthorized person except under court order.

**744 The University of Texas Health Science Center at Houston**

---

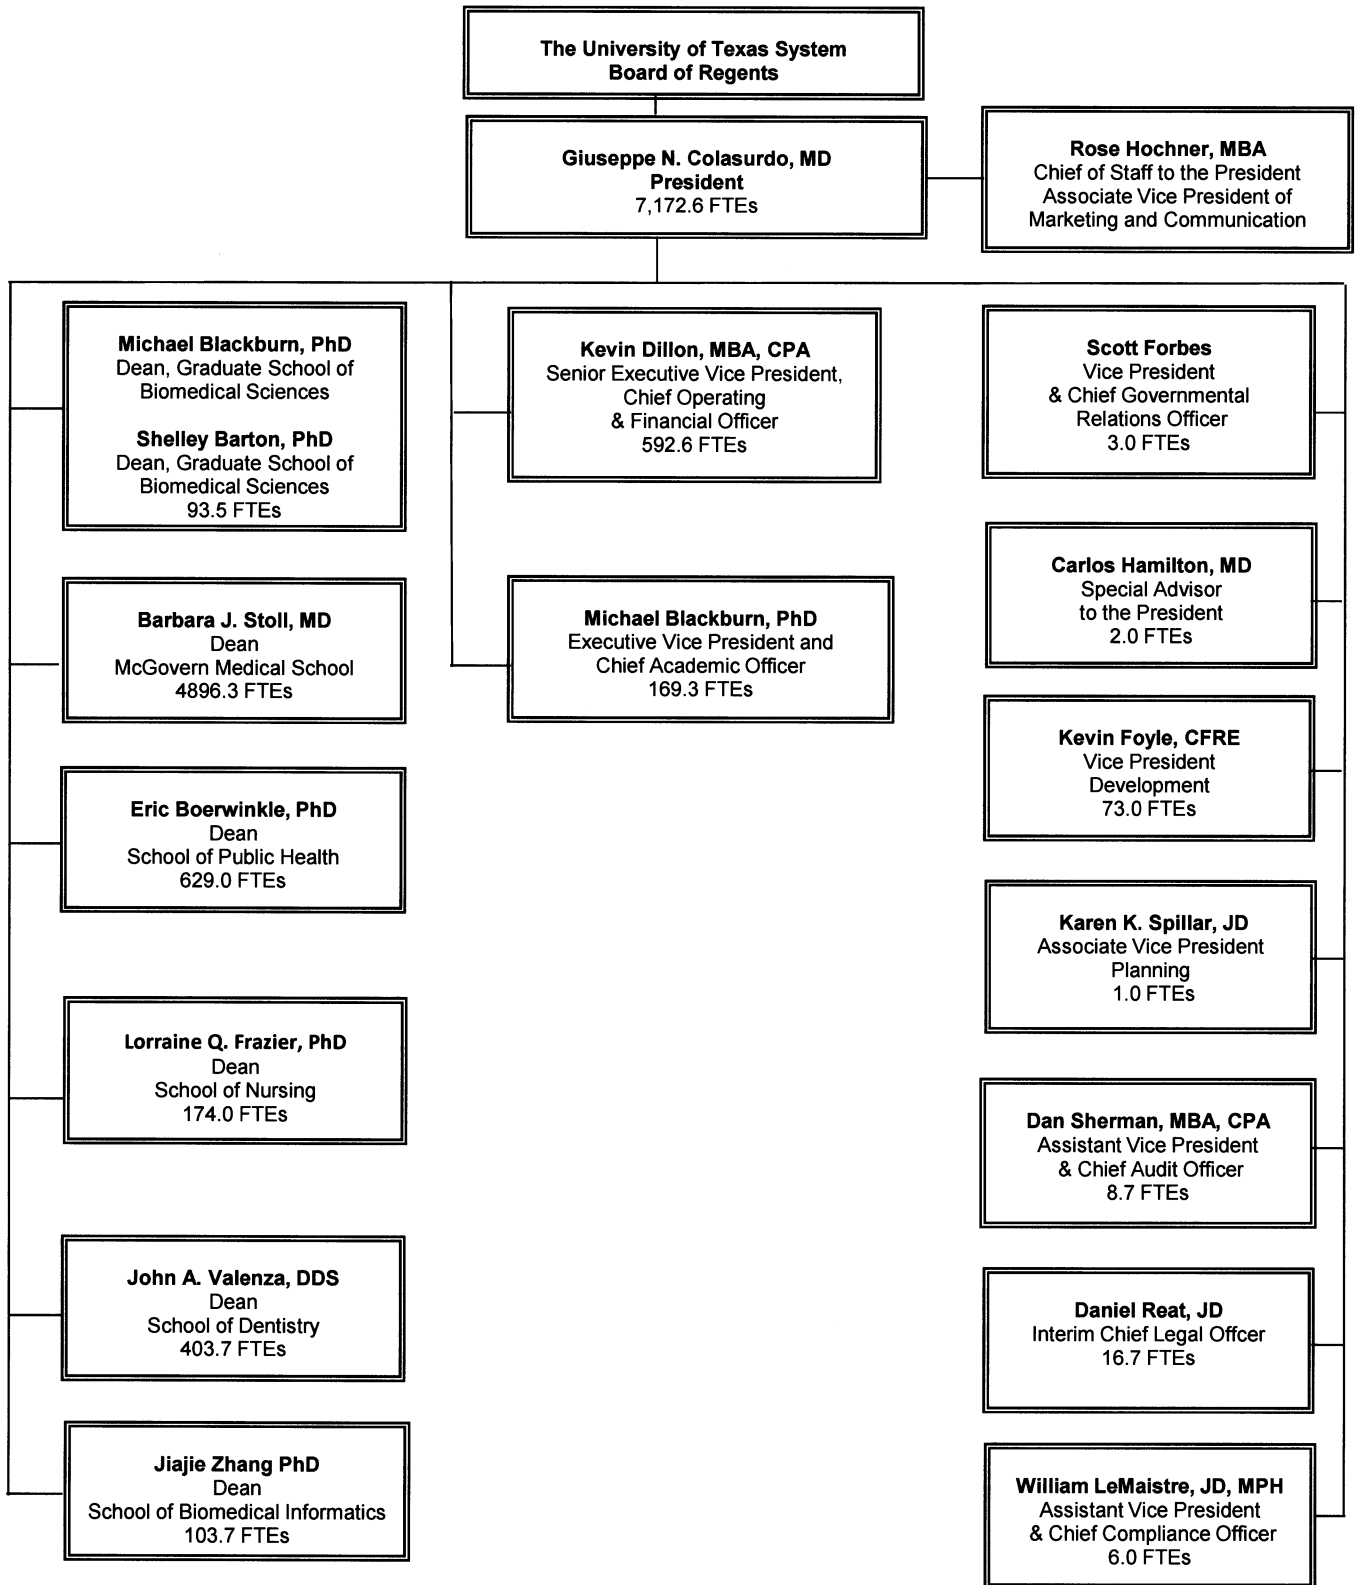

**CONCLUSION**

The requests in this LAR represent opportunities to position the State of Texas as an unequivocal leader on the national healthcare stage. These are prudent but impactful requests that will benefit all Texans:

- The Women's Health Education Research Center exceptional item will fund the development of cutting-edge treatments to combat the leading threats to women's health, improve outcomes, and reduce costs;
- The biomedical informatics instruction and operations weight change and the conversion of the dental clinical operations line item to a formula with additional funding will more adequately fund two high-impact programs. The former will attract big data business and investment to Texas, while the latter will educate the state's new generation of dentists and hygienists while meeting the oral health needs of the underserved in Harris County.
- The requested rider revision has no cost and will allow UTHealth to leverage federal funds and recruit the best MD/PhD students in the nation.

Finally, while we have proposed an across-the-board cut to special items and the DCO to meet the requirements set forth by state leadership, we respectfully note that failure to maintain those funds at current levels will severely limit our ability to continue groundbreaking work in the vital areas of research, education, and patient care.

### The University of Texas Health Science Center at Houston Executive Organization

## **The University of Texas Health Science Center at Houston Executive Organization Descriptions**

### **Office of the President**

**President** – Giuseppe N. Colasurdo, M.D., holds primary responsibility for the health science center’s success in educating students, conducting groundbreaking research, and maintaining a reputable and financially secure clinical practice.

**Senior Executive Vice President, Chief Operating and Financial Officer** – Kevin Dillon, M.B.A. C.P.A., provides financial oversight to each of the health science center’s six schools, the Harris County Psychiatric Center and the Brown Foundation Institute of Molecular Medicine as well as the medical practice plan. Mr. Dillon is also responsible for the health science center’s central financial and administrative services and campus-wide strategic planning efforts.

**Executive Vice President and Chief Academic Officer** – Michael Blackburn, Ph.D., manages the collaboration among researchers at the university’s schools of medicine, nursing, public health, biomedical informatics, biomedical sciences, and dentistry, as well as providing strategic leadership for the university’s research efforts.

### **Deans**

**Medical School** – Barbara J. Stoll, M.D., directs the school’s academic, research, clinical, and outreach activities.

**School of Dentistry** – John A. Valenza, D.D.S. directs the school’s academic, research, clinical, and outreach activities.

**School of Public Health** – Eric Boerwinkle, Ph.D., directs the school’s academic, research, and outreach activities.

**School of Biomedical Informatics** – Jiajie Zhang Ph.D., directs the school’s academic, research, and outreach activities.

**Graduate School of Biomedical Sciences** – Michael Blackburn, Ph.D., co-directs the school’s academic, research, and outreach activities.

**Graduate School of Biomedical Sciences** – Shelley Barton, Ph.D., co-directs the school’s academic, research, and outreach activities.

**School of Nursing** – Lorraine Q. Frazier, Ph.D., directs the school’s academic, research, clinical, and outreach activities.

## **Vice Presidents**

**Special Advisor to the President** – Carlos R. Hamilton, M.D., advises the President on policies and activities to further the university's goals.

**Governmental Relations** – Scott Forbes is the health science center's liaison to local, state, and federal government entities. He also advises Executive Leadership on issues of interest to elected officials.

**Institutional Compliance** – William LeMaistre, JD, MPH, is responsible for promoting compliance with all applicable legal and regulatory requirements.

**Internal Audit** – Dan Sherman, M.B.A., C.P.A., is responsible for ensuring that all academic and business operations comply with university policies and applicable regulations.

**Legal** – Daniel Reat, J.D., serves as an on-campus resource for general legal counsel, coordinates legal action either in defense of or on behalf of the health science center.

**Development** – Kevin Foyle, CFRE coordinates the development program including principal, planned, major and annual gifts, corporate and foundation relations and administrative and information services.

**Planning** – Karen K. Spillar, JD assist in long-term and strategic planning for the university.

**Budget Overview - Biennial Amounts**

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted medical student headcounts. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

------	-------------	----------	----------	----------	---------	---------

This special item is directed at addressing the State of Texas' critical health and public safety needs while building its human capital, increasing its workforce productivity, and decreasing its health care costs. According to the Texas Comptroller, health care costs account for more than 34% of the State of Texas' annual expenditures. These costs are being driven, in part, by unhealthy lifestyle choices, such as smoking, overeating, physical inactivity, and alcohol consumption, which lead to poor health outcomes, such as obesity, diabetes, kidney disease, heart disease, and cancer. These outcomes not only directly affect Texans, but also indirectly affect the Texas workforce and its productivity by increasing costs to employers through lost productivity, absenteeism, and disability.

The University of Texas School of Public Health (UTSPH) plays a crucial role in protecting and improving the health of Texans by preventing injury and disease, reducing health hazards, preparing for disasters, and promoting healthy lifestyles. The UTSPH accomplishes these objectives by training the population health workforce, doing translational research to discover new ways to keep people healthy and treat disease when it emerges, and by developing and disseminating innovative, cost-effective disease prevention programs. Population-based health programs reduce Medicaid and state employee health care costs.

Create the Center for Precision Health by recruiting the nation's top scientists in biomedical and health data sciences. Clinical, genomic, behavioral, and environmental data have increased exponentially over the past decade and offer unparalleled opportunities for new breakthroughs that can deliver precise and personalized diagnosis, treatment, and prevention to each individual. This center will position Texas as a leader in the Big Data economy by converting these big data into meaningful information and knowledge to support healthcare and biomedical discoveries.

------	-------------	----------	----------	----------	---------	---------

The UT School of Public Health Campus in Brownsville (UTSPH-B), formerly also the Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC), brings much-needed population health resources to the Lower Rio Grande Valley. The campus has created an integrated relationship with the new UTRGV and its school of medicine through joint faculty, joint education programs (dual degrees in medicine and public health and medicine and health informatics), and joint research programs. The campus has master's and doctoral students and conducts extensive research on high prevalence chronic diseases. This region of Texas has higher disease rates, is more economically depressed, has fewer health care providers, and has fewer people trained to address its population health needs.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The goal of the heart and stroke research special item is to apply the powerful new techniques of genomic and proteomic research to advance understanding of the causes, treatments and cure of major diseases, including cardiovascular diseases, neuro-degenerative diseases, cancer and metabolic disorders. The funds are used to recruit and retain outstanding scientists and to expand the research capacity of UTHealth, including the Institute of Molecular Medicine (IMM). Funding is targeted to improve Texas' position as a national leader in biomedical research and to build upon superb infrastructure and academic research programs by improving UTHealth's position in the market place to retain the very best of our scientists and to attract new talent. Funding also will allow Texas to invest in new research programs that can make a real difference to health care by supporting the most innovative and most rewarding new programs.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Biotechnology Program promotes the formation of cross-disciplinary programs and special projects related to biotechnology innovation and the creation of public-private partnerships to promote the commercialization of UTHealth biotechnology. The overall program fosters environments in which researchers, clinicians, and staff manage programs and projects widely beneficial to UTHealth, the Texas Medical Center, and the State of Texas. The Biotechnology Program has been designed to promote commercialization of discoveries and inventions that improve medical care and public health.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The goal of the World's Greatest Scientists special item is to build the capacity for application of the powerful new techniques of genomic and proteomic research, combined with expertise in bioinformatics, to advance the understanding of the causes, treatments and cure of major disease, including cardiovascular disease and stroke, neuro-degenerative diseases, lung disease, cancer, autoimmune diseases and metabolic disorders. This special item is an enhancement to the "Heart Disease and Stroke" special item.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Additional information for this strategy is available in Schedule 9, Special Item Information.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The UTHealth Medical School's Department of Psychiatry and Behavioral Sciences and the UTHealth Harris County Psychiatric Center are the primary leadership in the region for clinical training, research, and patient care for persons with mental illness. Through its inpatient and outpatient services, UT Psychiatry sees more than 18,000 patients every year. The patient population includes a broad range of behavioral disorders and illnesses.

This new special item has allowed the Department to expand new clinical research and intervention to further generate knowledge to identify persons with mental illness and treatment, evidence-based research to allow for long-term follow-up with validation of treatment and its effect on productivity, educational outcomes and overall well-being; and the evaluation of the effectiveness of treatment protocols.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), which is part of the Harris County Hospital District dba Harris Health System. Harris County has an estimated 1 million residents with no health insurance and an additional 500,000 underinsured residents. Funds allow UTHHealth to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and maintain primary care services at the Harris Health System Ambulatory Health Centers/Clinics.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

UTHealth maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services, including a mobile clinic that provides health care services and education to colonia residents who lack access to health care. The institutional presence also allows UTHealth the opportunity to recruit talented students from the South Texas region.

------	-------------	----------	----------	----------	---------	---------

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

UTHealth physicians staff the busiest trauma center in the nation at Memorial Hermann-TMC and have seen an unprecedented 30 percent increase in trauma volume over the last several years. UTHealth's Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding for this exceptional item will assist UTHealth in developing and moving its life-saving research to a large and diverse patient population. Trauma is the leading cause of death for persons aged 1 to 44 years, leading to a greater loss of lifetime income. Trauma will be the leading cause of death worldwide by 2020. Injury-related research funding lags far behind other diseases such as cancer and heart disease, despite the greater lifetime economic impact and youthful age of trauma's victims. In Texas, over 15,000 patients die from injury every year. The best practices and treatments established at UTHealth can be replicated statewide and could also be implemented in the military to care for injured soldiers. Additionally, a trauma patient returned to the workforce will pay greater dividends to the state than a trauma patient left unable to work and on governmental assistance due to injury.

GOAL: 5 Provide Special Item Support  
 OBJECTIVE: 5 Institutional Support Special Items  
 STRATEGY: 1 Institutional Enhancement

Service Categories:  
 Service: 19 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

Institutional Enhancement funding plays a significant role in financing the core mission of all health related institutions by providing a base level of funding for each institution's services and programs. Institutional Enhancement funding helps support leading edge and innovative programs in research and education not otherwise supported by formula funding.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Additional information for this strategy is available in Schedule 9, Special Item Information.

III-172

**Estimate Appropriation and Unexpended Balance.** Included in the amounts appropriated above are: (1) estimated appropriations of amounts available for distribution or investment returns out of the Permanent Endowment Fund for the University of Texas health Science Center at Houston No. 815 and 92) estimated appropriations of the institution's estimated allocation of amounts available for distribution out of the Permanent health Funds for Higher Education No. 810.

- a. Amounts available for distribution or investment returns in excess of the amounts estimated above are also appropriated to the institution. In the event that amounts available for distribution or investment returns are less than the amounts estimated above, this Act may not be construed as appropriated funds to make up the difference.
- b. All balances of estimated appropriations from the Permanent Endowment fund for The University of Texas Health Science Center at Houston no. 815 and of the institution's allocation from the amounts available for distribution out of the Permanent Health Fund for Higher Education No. 810 except for any General Revenue, at the close of the fiscal year ending August 31, ~~2015~~ 2017, and the income to said fund during the fiscal years beginning September 1, ~~2015~~ 2017, are hereby appropriated. Any unexpended appropriations made above as August 31, ~~2016~~ 2018, are hereby appropriated to the institution for the same purposes for fiscal year ~~2017~~ 2019.

*This rider has been changed to reflect the 2018-2019 Legislative Appropriations Request.*

5

III-173

**Unexpended Balances Between Fiscal Years: Regional Academic Health Center - Public Health.** Any unexpended balances of August 31, ~~2016~~ 2018, from the appropriations identified in Strategy E.1.1, Regional Academic Health Center-Public Health, are hereby appropriated to The University of Texas Health Science Center at Houston for the same purpose for the fiscal year beginning September 1, ~~2016~~ 2018.

*This rider has been changed to reflect the 2018-2019 Legislative Appropriations Request.*

**Limitation of Nonresident Enrollment in Certain State-supported Professional Schools.**

4. The University of Texas Health Science Center at Houston may admit up to 25 competitively recruited medical students in each entering class for a specialized program of clinical and research training designed to lead to the MD and PhD degrees irrespective of whether those students are Texas residents.

*Would allow UHealth to admit up to an additional 25 out-of-state MD/PhD degree students for a special program of clinical and research training. UHealth's Cullen Grant for these students has matured, and in order to renew the grant and apply for the NIH's Medical Scientist Training Program (MSTP) grant, UHealth must be able to recruit from a broader applicant pool for this highly specialized program. No additional funding is necessary for this request.*

**DESCRIPTION / JUSTIFICATION:**

UTHealth requests \$9 million/year to build a collaborative center to recruit top talent, conduct groundbreaking research, and educate a well prepared workforce to meet the health needs of Texas women.

To fully capitalize upon Texas's investments in women's health, the state must fund research, translation of discoveries into the clinic, and targeted workforce development. This investment will spur widespread advances that will improve access to effective, high-quality health care for Texas women.

The Women's Health Education and Research Center at UTHealth will provide a broad umbrella for collaborative research with the goals of: 1.) developing and testing innovative practice strategies to maximize the quality and cost-effectiveness of care; 2.) discovering cutting-edge treatments to combat the leading threats to women's health; 3.) identifying cost-effective preventive health measures to reduce women's health risks; 4.) studying and implementing evidence-based strategies to reduce the adverse health impact of medical co-morbidities and gynecological conditions on minority populations; 5.) expanding education and training programs for women's health care providers; 6.) target emerging threats to women's health like the Zika Virus; and 7.) building on existing clinical research infrastructure to expand the patient safety coordinating center for women's care and research.

	<b>Total Expenditures</b>		<b>14.1%</b>		<b>\$14,467,367</b>	<b>\$102,370,424</b>		<b>14.3%</b>		<b>\$17,279,239</b>	<b>\$121,237,003</b>	

**B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals**

**Attainment:**

The agency attained or exceeded one of five, or 20% of the applicable statewide HUB procurement goals in FY 2014.

The agency attained or exceeded zero of five, or 0% of the applicable statewide HUB procurement goals in FY 2015.

**Applicability:**

The "Heavy Construction" category is not applicable to agency operations in fiscal years 2014 and 2015 since the agency did not have any strategies or programs related to heavy construction.

**Factors Affecting Attainment:**

As a healthcare and research institution, each fiscal year there are sole source, and proprietary requirements, as well as existing contracts and conditions within the agency which preclude awards to other than the existing or specified contractors. We continue to research HUB potential; however, some non-availability continues in the areas of medical/research products, chemicals, blood and blood products. These types of purchases cross all purchasing categories for goods and services.

**"Good-Faith" Efforts:**

The institution participated in the following efforts: 1.) identified HUB contracting and subcontracting opportunities through one-on-one communication with buyers; 2.) met monthly with our HUB Advisory Group to communicate HUB Program information throughout the UTHSC-H community; 3.) organized annual HUB Vendor Fair featuring 18 HUB vendors; 4.) participation at the monthly Greater Houston Business Procurement Forum meetings; 5.) participation at the Small Business Administration's Matchmaking Event; 6.) participation in the Houston Minority Supplier Diversity Council's Annual EXPO; 7.) hosted Lunch-N-Learn's for our top HUB vendors as well as end users; 8.) attendance at SBA Quarterly meetings; 9.) sponsoring one mentor protégé relationships while working towards sponsoring a second mentor protégé relationship; 10.) participation in the Women's Business Enterprise Alliance Annual Expo.

**NO FUNDS WERE PASSED THROUGH TO LOCAL ENTITIES**

**NO FUNDS WERE PASSED THROUGH TO OTHER STATE AGENCIES OR INSTITUTIONS OF HIGHER EDUCATION**

**USE OF HOMELAND SECURITY FUNDS**

These funds are used to support implementation of a internet-based firefighter health and wellness program for volunteer fire departments using a cluster randomized controlled trial (CRCT) in a national sample of volunteer firefighters (VFF). This will be the first internet-based, occupationally tailored health and wellness program implemented for the VFS. TF20 will be an essential cost effective tool to address the epidemic of unhealthy body composition, nutrition and fitness among firefighters.

Agency code: 744 Agency name: **The University of Texas Health Science Center at Houston**

Item Priority and Name/ Method of Financing	REVENUE LOSS			REDUCTION AMOUNT			TARGET
	2018	2019	Biennial Total	2018	2019	Biennial Total	

**1 5% General Revenue Reduction to Special Items**

**Category:** Across the Board Reductions

**Item Comment:** UTHealth has reduced each of its 2018 and 2019 special items by 5% to lessen the fiscal impact on individual strategies. The resulting reductions translate into operational and service delivery constraints in many programs supported by these special items. Dental Clinic Operations will potentially need to reduce its support staff; funding reductions will reduce support levels for dental and dental hygiene students who are gaining experience in a clinical setting. Regional Academic Health Center-Public Health (RACH) and Service Delivery in the Valley Border Region programs will need to reduce FTEs given the high percentage of salaries budgeted in these strategies. Funding decreases will reduce administrative support and service delivery at the School of Public Health's Regional campus and in the Valley Border educational and research based programs which are improving health care services for the Valley's under-served population.

The Harris County Hospital District's LBJ hospital provides the setting for the clinical rotation of medical students, residents and fellows. The Hospital District's special item funding provides UTHealth with funding to support these medical student and residency programs. Reduction in funding will likely lead to erosion of the clinical spectrum that Medical School trainees experience, fewer trainees and a subsequent loss of physicians in Texas.

World's Greatest Scientist and Heart and Stroke programs funding reductions will impede recruitment efforts for outstanding scientists. Institutional Enhancement funding plays a significant role in financing our institution's core educational mission by providing funding for innovative programs in education not otherwise supported by formula funding. Coupled with previously absorbed reductions, an additional 5% cut in this strategy will negatively impact the level of programs and service we are able to deliver to our students.

**FTE Reductions (From FY 2018 and FY 2019 Base Request)**

**2 5% General Revenue Reduction to Special Items**

**Category:** Across the Board Reductions

**Item Comment:** Implementation of the 2nd 5% increment of the 10% reduction will result in substantial reductions in our core missions of education, public service and research. While reductions outlined in Section 1 comments will begin to impact administrative service levels and delivery of educational and research programs, an additional 5% cut will likely require downsizing of existing special item programs. Previous cuts, to the extent possible, preserved the faculty and staff critical to delivery of quality education and health care services in UTHealth's Dental Clinic Operation, RAHC and Harris County Hospital District endeavors. The 2nd 5% increment reduction will directly impact these critical staff as cuts must be absorbed in salaries. Biotechnology Program efforts, which include the formation of cross-disciplinary programs and projects related to biotechnology innovation, will be negatively impacted by an additional 5% funding reduction. Faculty recruitments funded by Heart and Stroke and World's Greatest Scientist items will be curtailed, limiting the addition of outstanding scientists to those previously recruited faculty members who have been integral to recent clinical/translational research advancements.

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:**     1           **Biomedical Informatics Research**

**(1) Year Special Item:**           2016  
Original Appropriations:   \$3,200,000

**(2) Mission of Special Item:**

Create the Center for Precision Health by recruiting the nation's top scientists in biomedical and health data sciences. Clinical, genomic, behavioral, and environmental data have increased exponentially over the past decade and offer unparalleled opportunities for new breakthroughs that can deliver precise and personalized diagnosis, treatment, and prevention to each individual. This center will position Texas as a leader in the Big Data economy by converting these big data into meaningful information and knowledge to support healthcare and biomedical discoveries.

**(3) (a) Major Accomplishments to Date:**

The Center for Precision Medicine has been created, jointly with the School of Public Health. The Director of the Center, Dr. Zhongming Zhao, was recruited from Vanderbilt University. Other center faculty members have also been recruited, including Peilin Jia (Vanderbilt), Assaf Gottlieb (IBM/Stanford), Luca Gioncaro (MIT), Han Chen (Harvard), Kirk Roberts (NIH), and Degui Zhi (UAB). In addition, thirty postdocs, graduate research assistants, programmers, and other personnel have been recruited. This Special Item also helped UTHealth to lead a \$12.4 million project from UT System to establish the UT CDN (Clinical Data Network) that will provide infrastructure support for big data and precision health research.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Over the next two years, the Center for Precision Health will be expanded from a school-based center to a university-wide center with additional researchers from the Schools of Medicine, Nursing, Dentistry, and Biomedical Sciences. Strong collaborations with other UT System institutions and the Texas Medical Center institutions are expected to grow substantially. A minimum of ten additional core faculty and twenty affiliated faculty will be recruited to the center, along with postdocs and students. The center's faculty will leverage the state funding to attract federal funds to support the expansion of the center's research programs in big data science and precision health. The Center for Precision Health will play a leadership role in placing Texas at a competitive position in the biomedical and health sectors of the Big Data revolution.

**(4) Funding Source Prior to Receiving Special Item Funding:**

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

The Big Data Revolution is no less profound than the Internet Revolution in the 1990s. Texas must be a leader in this revolution for continued economic viability when other states are making major investment in big data (e.g., Columbia's \$100 million Institute of Data Science & Engineering, Indiana University's \$120 million Precision Medicine Initiative, U of Colorado's \$63M Center for Personalized Medicine and Biomedical Informatics, and U of Michigan's \$100 million Institute for Data Science). UTHealth is in a distinctive position to lead the nation in biomedical informatics research and application. This funding will help improve the quality of patient care, accelerate biomedical discovery, as well as create jobs for Texans.

If the \$3.2 biennial funding stopped in FY2018-2019, the research at the Center for Precision Health would halt at a critical time when the National Precision Medicine Initiative is just launching and many of our peer institutions in other states have been investing heavily in precision medicine programs. This would also place us at a sizeable disadvantage in competition in the National Cancer Moonshot Initiative, which was announced on June 29, 2016 by the White House. With respect to personnel, any reduction or termination of funding would affect up to ten faculty positions and more than thirty other positions (student employees, postdocs, programmers, and staff members), including reduction in force for some or all the these positions.

---

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:**     2       **Psychiatry and Behavioral Sciences Research**

**(1) Year Special Item:**             2014  
Original Appropriations:   \$6,000,000

**(2) Mission of Special Item:**

The UTHealth Medical School's Department of Psychiatry and Behavioral Sciences and the UTHealth Harris County Psychiatric Center are the primary leadership in the region for clinical training, research, and patient care for persons with mental illness. Through its inpatient and outpatient services, UT Psychiatry sees more than 18,000 patients every year. The patient population includes a broad range of behavioral disorders and illnesses.

This new special item has allowed the Department to expand new clinical research and intervention to further generate knowledge to identify persons with mental illness and treatment, evidence-based research to allow for long-term follow-up with validation of treatment and its effect on productivity, educational outcomes and overall well-being; and the evaluation of the effectiveness of treatment protocols.

**(3) (a) Major Accomplishments to Date:**

- Recruited 14 clinician/scientist faculty and 15 post docs
- Published 422 articles/submitted 82 grant proposals
- Established many new programs, see below

Geriatric Research Program investigates psychiatric disorders and behavioral syndromes in neurological diseases and neurodegenerative conditions like Alzheimer's.

Psychiatric Genetics Program focuses on understanding the molecular mechanisms involved in mental illnesses and of antipsychotic medications.

Brain Bank Program studies brain disorders to understand how brain function regulates behavior.

fMRI Lab conducts translational research to understand neural processes at the interface between emotion and cognition.

Early Psychosis Research Program utilizes cognitive neuroscience techniques to understand brain function and develop novel treatments.

Post-Traumatic Stress Disorder Program seeks to develop and implement effective treatments for trauma survivors.

Translational Psychiatry Program conducts research on the pathophysiology and therapeutic targets in psychiatric disorders, including biomarkers in bipolar disorder.

Trauma and Grief Research Program researches the causes and consequences of adaptive/maladaptive responses to trauma and loss in youth, including associated risk and protective factors.

Psychological Intervention Research Program for Mood Spectrum Disorders researches the efficacy of psychological interventions and early identification of individuals at high risk.

---

**744 The University of Texas Health Science Center at Houston**

---

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

During the next two years, the Department of Psychiatry will continue to expand the programs and services listed above, fully utilizing the cohesive team of leading clinician/scientists recently recruited. We will continue to apply for NIH and federal grant funding. Our faculty will continue to publish in peer reviewed journals. In the next two years UT Psychiatry will expand our efforts to focus on early identification and intervention in children with mental illness. Early detection and diagnosis is critical to effective treatment. We have recently recruited a Vice Chair of Child and Adolescent Psychiatry who will lead the effort to focus on identifying/treating disorders at a young age, i.e., early pediatric psychosis and pediatric mood disorders. We will continue to pursue developing a research program on Eating Disorders. This has been a challenging area to recruit faculty and staff to begin a program. Researchers are finding that eating disorders are caused by a complex interaction of genetic, biological, behavioral, psychological, and social factors. Neuroimaging studies will provide a better understanding of eating disorders and possible treatments. We will expand our geriatric research program to develop new treatments and increase understanding of the cause of many of the severe mental illnesses. As the geriatric population increases the need continues to be unmet to address the complex treatment.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

Continuation of funding is critical to maintain the researchers and programs started under Special Item funding. Federal grant funds have been slow to be awarded. Our faculty have received excellent scores for many grant proposals submitted but have not achieved significant funding. Without continued funding, the programs would quite possibly not continue. The care of persons with mental health disorders and illnesses will not improve without new knowledge and treatments determined through effective research protocols. Funding sources for mental health research is limited, and given the State's mounting costs in mental health hospitals and community care, research is necessary to contribute to change both the outcomes and cost of care.

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:**     3     **Trauma Care**

**(1) Year Special Item:**             2012  
Original Appropriations:   \$500,000

**(2) Mission of Special Item:**

UTHealth physicians staff the busiest trauma center in the nation at Memorial Hermann-TMC and have seen an unprecedented 30 percent increase in trauma volume over the last several years. UTHealth's Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding for this exceptional item will assist UTHealth in developing and moving its life-saving research to a large and diverse patient population. Trauma is the leading cause of death for persons aged 1 to 44 years, leading to a greater loss of lifetime income. Trauma will be the leading cause of death worldwide by 2020. Injury-related research funding lags far behind other diseases such as cancer and heart disease, despite the greater lifetime economic impact and youthful age of trauma's victims. In Texas, over 15,000 patients die from injury every year. The best practices and treatments established at UTHealth can be replicated statewide and could also be implemented in the military to care for injured soldiers. Additionally, a trauma patient returned to the workforce will pay greater dividends to the state than a trauma patient left unable to work and on governmental assistance due to injury.

**(3) (a) Major Accomplishments to Date:**

The post Hurricane Ike emergency supplemental appropriation of \$6 million received in 2009 after the temporary closure of UTMB allowed UTHealth to: hire five additional physician faculty; incorporate existing faculty into trauma care; hire necessary support staff to provide exceptional care to additional trauma patients; and decrease the diversion rate to 5% from more than 40%. The additional staff, plus the implementation of CeTIR research at Memorial Hermann -TMC, contributed to a 20% decrease in overall trauma mortality and a 62% decrease in laparotomy patient mortality since 2008. CeTIR has led the regional deployment of tourniquets, resulting in a significant decrease in death from extremity bleeding. These efforts are being replicated across Texas and the country. Since the initial funding, faculty and staff at CeTIR have so far submitted 19 invention disclosures resulting in 2 license agreements and 1 spin-off company while participating in 65 funded studies and clinical trials and publishing over 680 unique manuscripts since 2008. This funding is key to pushing CeTIR discoveries from the lab to the patient. UTHealth, with its successful trauma research program CeTIR and its partnership with Memorial Hermann-TMC, the largest volume trauma center in the nation, has a unique opportunity to combine these two strengths to discover and test novel treatments, devices, and protocols to save lives and return Texans to their quality of life before the injury.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Additional programs to be considered over the next two years could include a focus on pre-hospital interventions and treatments, to not only improve overall patient outcomes, but also improve triage processes upon arrival to the emergency department. This could potentially result in decreased costs and accurate allocation of hospital resources. One of the pre-hospital initiatives involves testing a pathogen-reduced dried plasma product that will likely prevent mortality and other poor outcomes similarly to traditional plasma products, and also can be deployed in ground ambulance where logistics make stocking necessary plasma nearly impossible in both large urban centers and rural locations. In addition to this pre-hospital initiative, other potential programs to be considered could include designing a trial to test using off-the-shelf adult stem cells to prevent inflammatory consequences of traumatic injuries.. These models of care could prove to save money, return patients back to productive lives sooner and with fewer restrictions, and be replicated statewide in trauma centers. We have initiated a preventable death review of all 1600 trauma deaths in Harris County, and expect that the results will have far-reaching implications for the entire State. The funding will also help sustain proper staffing levels for both the trauma center and CeTIR to maintain and further an exceptional research program.

---

**744 The University of Texas Health Science Center at Houston**

---

**(4) Funding Source Prior to Receiving Special Item Funding:**

UTHealth received a post-Hurricane Ike emergency supplemental appropriation in 2009 of \$6 million and \$1 million in this exceptional item since FY 2012/2013.

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

UTHealth is in a distinctive position to lead the nation in trauma research, discovery and care. This funding will help push translational research from labs to the patient and help maintain the staffing levels to handle increases in trauma volume as the population in the region increases. The trauma volume at UTHealth's partner hospital has increased by five percent annually over the past two years and is up 30 percent in the last five years. Without this funding, Texas will miss out on an excellent opportunity to be the hub of trauma research nationally, provide life-saving therapeutics to Texans that maintain their quality of life and contribution to society, and maintain the proper staff levels to prevent temporary closures of the trauma center to new patients when the trauma center's capacity exceeds safe levels. Without this funding, discoveries benefiting military trauma care will suffer as well.

---

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item: 4 Improving Public Health in Texas Communities**

**(1) Year Special Item:** 2010  
Original Appropriations: \$4,750,000

**(2) Mission of Special Item:**

This special item is directed at addressing the State of Texas' critical health and public safety needs while building its human capital, increasing its workforce productivity, and decreasing its health care costs. According to the Texas Comptroller, health care costs account for more than 34% of the State of Texas' annual expenditures. These costs are being driven, in part, by unhealthy lifestyle choices, such as smoking, overeating, physical inactivity, and alcohol consumption, which lead to poor health outcomes, such as obesity, diabetes, kidney disease, heart disease, and cancer. These outcomes not only directly affect Texans, but also indirectly affect the Texas workforce and its productivity by increasing costs to employers through lost productivity, absenteeism, and disability.

The University of Texas School of Public Health (UTSPH) plays a crucial role in protecting and improving the health of Texans by preventing injury and disease, reducing health hazards, preparing for disasters, and promoting healthy lifestyles. The UTSPH accomplishes these objectives by training the population health workforce, doing translational research to discover new ways to keep people healthy and treat disease when it emerges, and by developing and disseminating innovative, cost-effective disease prevention programs. Population-based health programs reduce Medicaid and state employee health care costs.

**(3) (a) Major Accomplishments to Date:**

The UTSPH has accomplished the goal of increasing its enrollment by 25% and sustaining its enrollment at 1,300 students. The UTSPH is also disseminating effective prevention programs to more than a million young Texans annually.

The UTSPH has agreements to train MD/MPH students with most medical schools in Texas and, thus, it trains more MD/MPH students than any school of public health in the nation. The UTSPH also has joint MPH programs with schools of dentistry, nursing, social work, law, and business, which ensures that practitioners and professionals from many sectors will be prepared to solve the complex health and public safety issues affecting Texas.

The faculty and students in the UTSPH also carry out cutting-edge research to better prevent disease and better treat disease, when it occurs. Our research programs in Health Promotion and Human Genetics are among the most recognized in the nation. Each year, the UTSPH secures approximately \$52 million in federal research dollars, which ranks 10th in the nation for all schools and programs of public health.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

With this funding, the UTSPH will expand its reach by developing cost-effective educational programs using stackable and flexible certificates that can fill the demand for human capital and build a flexible learning economy that can translate into earned degrees, certifications that train the existing workforce, and lifelong professional training to meet the health and safety needs of Texas. In a recent independent survey of the greater Houston region, public health was the greatest training need to fill open and emerging jobs. Moreover, the UTSPH will continue to upgrade its training so that health care professionals can efficiently and effectively operate in the new health care economy while providing the most effective prevention strategies to their clients. The UTSPH will use state-of-the-art technology to deliver educational experiences that are interactive, immersive, and effective in addressing the State of Texas' public health training needs. These experiences will be aligned with industry needs and offer lifelong learning to address the rapid and complex changes in the world.

---

**744 The University of Texas Health Science Center at Houston**

---

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

Y

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

Without this funding, the UTSPH will lose its competitive edge in providing high-quality, responsive public health education to students. Consequently, the UTSPH will risk losing students to schools of public health in other states, which, in turn, will lead to losing future practitioners and professionals who could effectively address the health and safety needs of Texas. A funding reduction would limit the number of students, health professionals, and other employees that the UTSPH could reach, which, in turn, would limit its ability to disseminate effective programs across Texas. UTSPH has some of the lowest graduate tuition in the country. In fact, UTSPH receives many applications from across the country willing to pay the out-of-state tuition because it is lower than their in-state tuition rates.

Even a small cut to public health is unsustainable. The impact trickles into the community resulting in elimination of programs, projects, services, students turned away from a career in public health, the pregnant woman who wasn't screened, and the diabetic who went to the ER for insulin.

The population of Texas is young and the time for disease prevention is now to reduce the risk of later obesity, heart disease and cancer. Similarly, with its long border with Mexico, international airports and huge port facilities, there are fast growing needs in disaster preparedness and increased readiness for emerging infectious diseases.

---

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item: 5 World's Greatest Scientists**

**(1) Year Special Item:** 2008  
**Original Appropriations:** \$2,500,000

**(2) Mission of Special Item:**

The goal of the World's Greatest Scientists special item is to build the capacity for application of the powerful new techniques of genomic and proteomic research, combined with expertise in bioinformatics, to advance the understanding of the causes, treatments and cure of major disease, including cardiovascular disease and stroke, neuro-degenerative diseases, lung disease, cancer, autoimmune diseases and metabolic disorders. This special item is an enhancement to the "Heart Disease and Stroke" special item.

**(3) (a) Major Accomplishments to Date:**

UTHealth has been successful in the recruitment of top faculty to the McGovern Medical School and the Brown Foundation Institute of Molecular Medicine:

- Recruitment of three top faculty in metabolic diseases with particular focus on diabetes was recently completed (IMM Center for Metabolic and Degenerative Diseases);
- A joint recruitment with the McGovern Medical School and School of Biomedical Informatics of five talented faculty has resulted in establishment of the Centers for Proteomics and Systems Biology;
- Recruitment of one faculty in bioinformatics completed (Center for Cardiovascular Genetic Research);
- Two new faculty with expertise in drug discovery and development also recently recruited (IMM Texas Therapeutics Institute);
- Recruitment of star faculty in molecular imaging completed (Center for Molecular Imaging);
- Recruitment of an expert in Alzheimer's disease is continuing (Center for Neurodegenerative Diseases);
- Substantial expansion of the Center for Regenerative Medicine with five new faculty, several of whom have cross appointments in departments of Neurology and Neurosurgery.

Specific scientific accomplishments include: discovery of a common gene variant associated with aortic dissection; the discovery of a set of protein biomarkers that can identify pre-term false labor; completion of the world's first genome-wide analyses of diabetes, coronary artery disease and hypertension.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Funds will be targeted to continue to improve Texas' position as a national leader in biomedical research and to build upon our superb infrastructure and academic research programs by improving our position in the marketplace to retain the very best of our scientists and to attract new talent. Funding will allow Texas to invest in new research and new research programs that can make a real difference to health care by supporting the most innovative and potentially most rewarding new research programs.

Special focus will include new recruitments to strengthen and expand our basic and applied research, plus drug discovery efforts in metabolic disorders, heart, stroke and neurological diseases.

---

**744 The University of Texas Health Science Center at Houston**

---

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

Substantial progress in enhancing international research impact of the IMM has been achieved over the last 3 years. These include new IMM centers in: Metabolic and Degenerative Diseases, Precision Biomedicine, Tissue Engineering and Aging Research. In addition the Texas Therapeutics Institute and the Center for Stem Cell and Regenerative Medicine have been substantially expanded. In parallel, 22 new faculty have been recruited into IMM, either as primary appointed IMM faculty, or on joint appointments with Medical school clinical departments. New core research service centers were developed to support the research productivity of IMM resident faculty as well as being made available to other faculty across the broader medical school. Substantial collaborative programs have been established with neurosurgery, pediatric surgery, organ transplantation and orthopedic surgery. Overall IMM resident faculty numbers have increased from 46 in 2011 to 56 in 2015. Growth in grant income / research expenditures of IMM resident faculty have approximately doubled over the last 3 years to ~\$19M in 2015. Since this special item funding provides key core support to the research operations of the IMM, all of these accomplishments will be in jeopardy should funding cease.

---

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item: 6 Regional Academic Health Center - Public Health**

**(1) Year Special Item:** 2006  
**Original Appropriations:** \$454,889

**(2) Mission of Special Item:**

The UT School of Public Health Campus in Brownsville (UTSPH-B), formerly also the Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC), brings much-needed population health resources to the Lower Rio Grande Valley. The campus has created an integrated relationship with the new UTRGV and its school of medicine through joint faculty, joint education programs (dual degrees in medicine and public health and medicine and health informatics), and joint research programs. The campus has master's and doctoral students and conducts extensive research on high prevalence chronic diseases. This region of Texas has higher disease rates, is more economically depressed, has fewer health care providers, and has fewer people trained to address its population health needs.

**(3) (a) Major Accomplishments to Date:**

The Brownsville Campus and its Hispanic Health Research Center have brought in more than \$65 million in external funding, including research and population health and delivery system reform incentive program (DSRIP) funds over the past 16 years. The UTSPH-B has created a region-wide population health research and intervention program that includes the Cameron County Hispanic Cohort and ranges from Brownsville to Laredo, including 3 clinical research units. Collaborators include UTHealth, UTHSCSA, MD Anderson, and UTMB, as well as UTRGV. Campus faculty have published nearly 150 peer-reviewed papers on health conditions in the region. The publications provided the basis for the campus faculty to write the needs assessment for the entire Regional Healthcare Partnership 5 plan and for the campus to conduct 8 projects under the 1115 waiver program supported by UTHSCSA and UTHealth. UTSPH-B has worked extensively with the City of Brownsville on creating major environmental and policy changes that are gradually transforming Brownsville into a healthy community. Consequently, the city won the prestigious and highly competitive Culture of Health Award from the Robert Wood Johnson Foundation in 2014. UTSPH-B campus and faculty are playing major roles in collaboration with the new UTRGV and its school of medicine by creating 2 dual degree programs and 2 programs for UTRGV undergraduates to pursue certificates and master's degrees in public health and health informatics.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

UTSPH-B will continue to expand our research and intervention to other cities in the region, to conduct more research into the nature of health disparities in our population in collaboration with UTRGV and STDOI, and our collaborators over Texas. We will also expand interventions in the region to address obesity and diabetes. The SPH Brownsville Campus is a key regional leader in the 1115 waiver to transform health delivery in Texas and will continue leadership in that program extension.

**(4) Funding Source Prior to Receiving Special Item Funding:**

**(5) Formula Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

The University of Texas School of Public Health Brownsville Regional Campus will suffer a significant reduction in services and programs that serve the poorest populations, those with the most health disparities, and the highest levels of chronic disease in the state. While much progress has been made, a decrease in budget will be counterproductive to our efforts to improve the health of this region. The State's investment in this program has been highly cost effective. A reduction in funding will also significantly affect the ongoing integration of the UTSPH-B with the new medical school and university, and will impede the implementation of the 4 joint educational programs between UTSPH-B and UTRGV, as well as slow the creation of the newly trained public health work force that is sorely needed in this region of Texas.

---

**Special Item:**     7     **Heart Disease and Stroke**

**(1) Year Special Item:**             2002  
Original Appropriations:   \$3,000,000

**(2) Mission of Special Item:**

The goal of the heart and stroke research special item is to apply the powerful new techniques of genomic and proteomic research to advance understanding of the causes, treatments and cure of major diseases, including cardiovascular diseases, neuro-degenerative diseases, cancer and metabolic disorders. The funds are used to recruit and retain outstanding scientists and to expand the research capacity of UTHealth, including the Institute of Molecular Medicine (IMM). Funding is targeted to improve Texas' position as a national leader in biomedical research and to build upon superb infrastructure and academic research programs by improving UTHealth's position in the market place to retain the very best of our scientists and to attract new talent. Funding also will allow Texas to invest in new research programs that can make a real difference to health care by supporting the most innovative and most rewarding new programs.

**(3) (a) Major Accomplishments to Date:**

Researchers have identified genes that alter the response to anti-hypertensive therapy and anti-cholesterol medications and genes in which the mutation predisposes patients to the development of stroke. Supported by additional funds from Senator Lloyd and B.A. Bentsen Center for Stroke Research, we have leveraged a significant new initiative in developing novel therapies for stroke patients. Over fifty faculty and their supporting teams have been either retained or recruited with expertise in molecular imaging, exon capture/next generation sequencing and bioinformatics analysis, proteomics, metabolic diseases, nanomedicine, therapeutics and drug discovery, providing a comprehensive set of expertise, resources and new technologies for active multidisciplinary research being conducted into complex cardiovascular disorders and stroke. Recently developed research centers include programs at the IMM: Center for Molecular Imaging, Centers for Proteomics and Systems Biology, the Texas Therapeutics Institute, the Senator Lloyd and B.A. Bentsen Center for Stroke Research, and the Center for Metabolic and Degenerative Diseases, concentrating on diabetes and obesity. Strengthened existing research centers include: Center for Cardiovascular Genetic Research, Center for Regenerative Medicine and the Center for Human Genetics. Funds also provide research support to several faculty members in the Medical School, specifically in Neurology and Neurosurgery.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

In addition to recruiting key research faculty, UTHealth expects to continue cutting-edge translational research on life-saving treatments for those suffering from heart disease or stroke as well as prevention programs to promote longer, healthier lives. Scientists also will focus on new functional territories of the application of metabolic research as applied to heart, stroke, metabolic, and neurological diseases.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

Substantial progress in enhancing international research impact of the IMM has been achieved over the last 3 years. These include new IMM centers in Metabolic and Degenerative Diseases, Precision Biomedicine, Tissue Engineering, and Aging Research. In addition, the Texas Therapeutics Institute and the Center for Stem Cell and Regenerative Medicine have been substantially expanded. In parallel, 22 new faculty have been recruited into IMM, either as primary appointed IMM faculty, or on joint appointments with McGovern Medical School clinical departments. New core research service centers were developed to support the research productivity of IMM resident faculty, as well as being made available to other faculty across the broader medical school. Substantial collaborative programs have been established with neurosurgery, pediatric surgery, organ transplantation and orthopedic surgery. Overall IMM resident faculty numbers have increased from 46 in 2011 to 56 in 2015. Growth in grant income / research expenditures of IMM resident faculty have approximately doubled over the last 3 years to ~\$19M in 2015. Since this special item funding provides key core support to the research operations of the IMM, all of these accomplishments will be in jeopardy should funding cease.

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:     8           Biotechnology Program**

**(1) Year Special Item:**           2002  
Original Appropriations:   \$1,000,000

**(2) Mission of Special Item:**

The Biotechnology Program promotes the formation of cross-disciplinary programs and special projects related to biotechnology innovation and the creation of public-private partnerships to promote the commercialization of UTHealth biotechnology. The overall program fosters environments in which researchers, clinicians, and staff manage programs and projects widely beneficial to UTHealth, the Texas Medical Center, and the State of Texas. The Biotechnology Program has been designed to promote commercialization of discoveries and inventions that improve medical care and public health.

**(3) (a) Major Accomplishments to Date:**

Assisted in the development of the following clinical and translational research programs:

- Recent renewal of Clinical and Translational Science Award (CTSA) from NIH for five more years. In 2006, UTHealth received this award to accelerate the translation of laboratory discoveries into patient treatments. UTHealth was one of the first 12 CTSA awardees (even before Harvard) along with Yale, Mayo, Columbia, Duke, UPenn, and other academic health institutions on the east and west coasts.
- Center for Translational Injury Research.
- Center for Clinical and Translation Sciences (CCTS) High-Throughput Screening Laboratory –stage proof of concept studies and new company formation.
- Creation of the 20,000 sq. ft. UTHealth Biotechnology Commercialization Center incubator to provide laboratory, office and conferencing facilities; currently nine tenant companies. The Center has provided key laboratory and office space to 18 biotechnology companies representing all major life science areas.
- Creation of a new Office of Strategic Industry Initiatives.
- Cumulative license or option agreements: 420
- Cumulative patent applications filed to date: more than 1,700
- Cumulative portfolio startup companies formed: 41

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**744 The University of Texas Health Science Center at Houston**

---

- Increase education and outreach including an internship program for MBA and law students from local universities.
- Continue the progress with the Clinical and Translational Science Award (CTSA) from NIH.
- Stage proof of concept studies and new company formation for the Center for Clinical and Translation Sciences (CCTS) High-Throughput Screening Laboratory.
- Enhance utilization of the 20,000 sq. ft. UTHSC-H Biotechnology Commercialization Center incubator to provide laboratory, office and conferencing facilities; currently nine tenant companies.
- Establish new University-Industry partnerships through the newly created Office of Strategic Industry Initiatives.
- Continue to look for opportunities to turn UTHealth inventors/discoverers into entrepreneurs and put more lifesaving products from UTHealth faculty and students into the healthcare space.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

Investment in the development of biotechnology through the UTHealth Biotechnology Program is critical to the successful commercialization of research being conducted within the University. Investment in new R & D programs, the cultivation of new technologies and their transfer through licensing agreements, partnerships with the private sector and new ventures will be used to create new opportunities for economic development in Houston and in Texas. Failure to do so will result in the loss of a competitive advantage and new opportunities to compete with academic technology centers like those associated with Harvard, MIT, Stanford, University of California, University of North Carolina, NC State and Duke University. Texas would lose its ability to attract and retain world-renowned experts, discover, develop and commercialize needed products that improve medical care and public health in Texas.

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:**     9           **Institutional Enhancement**

**(1) Year Special Item:**           2000  
Original Appropriations:   \$1,000,000

**(2) Mission of Special Item:**

Institutional Enhancement funding plays a significant role in financing the core mission of all health related institutions by providing a base level of funding for each institution's services and programs. Institutional Enhancement funding helps support leading edge and innovative programs in research and education not otherwise supported by formula funding.

**(3) (a) Major Accomplishments to Date:**

UTHealth was able to allocate these funds to augment formula and non-formula sources. Activities included student services and academic programs, investments in equipment, and other infrastructure needs, including research infrastructure support.

These funds have helped in some measure to maintain UTHealth's status as the largest (measured by FTSEs) and most comprehensive health related institution in not only Texas, but the Southwestern United States. Additionally, these institutional enhancement funds help UTHealth meet some of the rules and reporting requirements that are required by federal and state agencies.

These funds also help keep tuition low for our students. Each of UTHealth's six schools boasts some of the lowest tuition and debt after degree costs in the nation. A U.S. News and World Report ranked UTHealth's McGovern Medical School as the medical school with the lowest debt after graduation in the nation.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

UTHealth will continue to supplement funding for its academic, research, and infrastructure activities.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

In order to provide the State of Texas with a critical mass of health professionals and bench scientists, it is important to ensure the quality and reputation of the State's health-related institutions. Without sufficient investment in higher education, Texas stands to lose exceptional students and faculty to other states. Additionally, recent efforts to strengthen core services will cease if funding levels are reduced. Without this funding, UTHealth will be unable to preserve some of its existing academic and research programs in pursuit of the overall mission of instruction, research, and patient care.

---

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:**     10     **Harris County Hospital District**

**(1) Year Special Item:**             1990  
Original Appropriations:   \$1,000,000

**(2) Mission of Special Item:**

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), which is part of the Harris County Hospital District dba Harris Health System. Harris County has an estimated 1 million residents with no health insurance and an additional 500,000 underinsured residents. Funds allow UTHealth to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and maintain primary care services at the Harris Health System Ambulatory Health Centers/Clinics.

**(3) (a) Major Accomplishments to Date:**

During FY 2016, UTHealth faculty, along with undergraduate and graduate medical education trainees, provided care to a substantial number of the total clinic visits at Harris Health System primary care and subspecialty care settings, (538,555 patients ) while providing clinical inpatient and outpatient experiences to augment the academic training for medical students, residents, and fellows. Residents in clinical rotations increased from 226 to 248 between FY2013 and FY2016 . In Harris Health System facilities, faculty participated in more than 124 research studies and improved care according to Det Norske Veitas Healthcare NIAHO accreditation program (DNV) core quality indicators. Per the Thompson-Reuters Solucient database, LBJ operates with lower mortality, fewer complications, and lower cost than comparative hospitals while operating at the expected length of stay.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

A Quality Program will be created at LBJGH. UTHealth will incorporate Resident Quality Training that will include new curriculum and trainee involved quality projects that will include faculty and Harris County Hospital District employee participation. A major goal of this Quality Program is to create a Quality Fellowship to help further the program.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

---

**744 The University of Texas Health Science Center at Houston**

---

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

Loss of these funds will severely hamper UTHealth's ability to provide quality care to indigent Texans in Harris County who cannot otherwise afford care. Further, critically needed medical student rotations and resident GME positions would be severely reduced or eliminated. The Harris Health System through LBJ Hospital and its associated clinics provides an important contrast of experience and clinical pathology compared to other medical school associated hospitals and provides significant service to the community. Not funding would likely lead to an erosion of the clinical spectrum that our medical school's trainees experience, as well as to fewer trainees and a subsequent reduction in the number of physicians in Texas.

LBJ Hospital provides the setting for the clinical rotation of 480 medical students (third and fourth year McGovern Medical School students) and 248 residents and fellows annually. The item is critical to recruiting and retaining physicians in Texas and providing quality medical care to local communities. We would be unable to support medical student and residency programs without this funding given the cost of extensive external regulatory body requirements related to these programs.

---

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:** 11      **Service Delivery in the Valley/Border Region**

**(1) Year Special Item:** 1986  
Original Appropriations: \$216,816

**(2) Mission of Special Item:**

UTHealth maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services, including a mobile clinic that provides health care services and education to colonia residents who lack access to health care. The institutional presence also allows UTHealth the opportunity to recruit talented students from the South Texas region.

**(3) (a) Major Accomplishments to Date:**

In 2007, UTHealth entered into an exclusive agreement with Cameron County for delivery of services to their underserved residents earning it a "Texas County Award" for outstanding health care services to border residents. The Mobile Clinic provides health care services to colonia patients, including Pap smears, immunizations, and lipid and glucose screenings. In the summer, the Mobile Health Clinic staff set up immunization clinics at local schools to ensure that school children have all their required immunizations. It provides clinical rotations for UTHealth's 4th-year medical students. In 2010, a group of medical students in Frontera de Salud began partnering with the Mobile Clinic in quarterly outreach trips to communities in Cameron County. During these visits, students perform health screenings and also provide educational sessions in healthy cooking and lifestyle changes. The Mobile Van, using telemedicine and its association with the UTHealth Department of Internal Medicine, allows patients to be treated for various medical conditions, thereby limiting patient trips to the emergency room. The mobile clinic partners with the UTHealth School of Public Health Brownsville Campus to expand clinical research that is specific to the Hispanic community. In 2015, the van saw 1,620 patients, did 95 well-woman exams, vaccinated 215 children, and vaccinated 225 adults with the flu vaccine. A new mobile clinic was purchased in 2005, and the 1986 mobile clinic was retired.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

We hope to expand our services to other location sites in Health Professions Shortage Areas in Cameron County to serve even more patients who lack access to health care. It is also our intent to continue to provide screenings for hypertension, diabetes and obesity, and to educate and treat indigent patients with these conditions, which are more prevalent in the Lower Rio Grande Valley. We want to continue to serve as a teaching site for our medical students with the hopes that exposure to this patient population will encourage them to eventually practice in this community or similar underserved communities in Texas.

We are seeking ways to expand our research to include more patients from the colonias that we serve. Due to the rural locations of the colonias, these patients are often not included in important studies that directly affect their community, which can contribute to health care disparities. Included in the expansion is our cardiovascular disease and diabetes research. In addition, we are exploring opportunities with our UTHealth School of Dentistry about expanding our coverage to provide dental services as well.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

---

**744 The University of Texas Health Science Center at Houston**

---

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

If funds are not provided, UTHealth will be unable to meet the legislative intent of this special item. The Texas-Mexico border will lose critically needed medical services for the medically underserved, as well as education opportunities for our students. The Mobile Health Clinic would cease to function in the colonias along the Border. In addition, we will not be able to continue our important education, outreach, and research in the colonias that we serve.

If there is a 10% reduction (\$14,000 per year), then approximately 160 patients per year would not be seen. If 50% of these unseen patients choose to go to the emergency department for their care, the emergency department costs would increase by 80 x \$1,000 (estimated minimal emergency department cost per patient for non-emergent treatment - \$80,000 total).

Similarly, if there is a 4% reduction (\$5,600 per year), 64 patients per year would not be seen. Again, if 50% of these unseen patients choose to go to the emergency department for non-emergent care, emergency department costs would increase by 32 x \$1,000, equaling \$32,000.

In addition, teaching services and health care disparities research would decrease for the already underserved border population.

---

---

**744 The University of Texas Health Science Center at Houston**

---

**Special Item:**     12     **Women's Health Education and Research Center**

**(1) Year Special Item:**             2018  
Original Appropriations:   \$9,000,000

**(2) Mission of Special Item:**

UTHealth requests \$9 million/year to build a collaborative center to recruit top talent, conduct groundbreaking research, and educate a well prepared workforce to meet the health needs of Texas women.

To fully capitalize upon Texas's investments in women's health, the state must fund research, translation of discoveries into the clinic, and targeted workforce development. This investment will spur widespread advances that will improve access to effective, high-quality health care for Texas women.

The Women's Health Education and Research Center at UTHealth will provide a broad umbrella for collaborative research with the goals of: 1.) developing and testing innovative practice strategies to maximize the quality and cost-effectiveness of care; 2.) discovering cutting-edge treatments to combat the leading threats to women's health; 3.) identifying cost-effective preventive health measures to reduce women's health risks; 4.) studying and implementing evidence-based strategies to reduce the adverse health impact of medical co-morbidities and gynecological conditions on minority populations; 5.) expanding education and training programs for women's health care providers; 6.) target emerging threats to women's health like the Zika Virus; and 7.) building on existing clinical research infrastructure to expand the patient safety coordinating center for women's care and research.

**(3) (a) Major Accomplishments to Date:**

As an example, Ob/Gyn researchers have had multiple scientific contributions:

Researchers in the department have had multiple scientific contributions that have made significant scientific advanced that have improved care for women. Our clinical trials team has been a leading center for the largest study performed in the United States regarding fetal monitoring in labor to decrease neonatal morbidity related to birth asphyxia. Given the fact that over 3 million women per year in the US undergo fetal monitoring during labor, the impact is substantial. Another major contribution was testing the benefit of antenatal corticosteroids for women with late preterm birth; this intervention has been a game changer for preterm newborns delivered in late preterm birth period (75% of all preterm births). Both of these studies were published in the New England Journal of Medicine. Our translational researchers have tested and developed a new patch for closure of spinal defect before birth which may improve outcomes for children with spinal bifida. Another translation researcher has developed a technique to enhance personalized (precision) medicine approach to use of medications to stop preterm birth.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**744 The University of Texas Health Science Center at Houston**

---

As Texas' most comprehensive health science center, UTHealth is in a unique position to leverage its diverse capabilities in clinic and bench research, demographic and epidemiological analysis, big data analysis, and education to make discoveries, translate them to practice, and teach them to tomorrow's workforce.

Principle areas of investigation will include:

- Improving outcomes and reducing healthcare costs related to pregnancy and birth, cancer, cardiovascular disease, obesity, and aging;
- Addressing health disparities, including cancer surveillance and detection among Hispanic women and high rates of early preterm birth and infant mortality among African-American women;
- Expanding education and training programs for women's healthcare providers, including expanding clinical rotation opportunities for nursing students to women's shelters, training primary care providers in gynecological care to improve access in areas that lack OB/GYNs, and training OB/GYN physicians with respect to basic health and mental health issues to ensure more holistic treatment of women's needs; and
- Expanding existing clinical research infrastructure to design, conduct, analyze, and disseminate the findings of comparative effectiveness and quality improvement research related to perinatal medicine and women's health.

**(4) Funding Source Prior to Receiving Special Item Funding:**

N/A

**(5) Formula Funding:**

N

**(6) Startup Funding:**

N

**(7) Transition Funding:**

N

**(8) Non-general Revenue Sources of Funding:**

N/A

**(9) Consequences of Not Funding:**

If funding is not approved, UTHealth will not be able to advance research in areas of birth defect prevention and reduction in prematurity, women's cardiovascular health, quality and patient safety, workforce development, and other areas that impact the health of women.

---
