Schedule 8C	Revenue Capacity for Tuition Revenue Bond Projects			

745 The University of Texas Health Science Center at San Antonio

The University of Texas Health Science Center at San Antonio (UTHSCSA), one of six health-related components of the University of Texas System, submits the following Legislative Appropriations Request (LAR) for fiscal years 2018 and 2019 to the Governor's Office of Budget, Planning and Policy and the Legislative Budget Board (LBB).

1. Historical Overview

The UTHSCSA was legislatively approved in 1959 as the South Texas Medical School and graduated its first class of medical students in 1970. In the 1970s, our institution evolved into a comprehensive academic health center with schools of Medicine, Dentistry, Health Professions, Nursing and Biomedical Sciences. To date, we have graduated more than 32,200 students. Fall 2015 student enrollment was 3,130, plus 984 residents and post-graduate trainees served by faculty and staff of just over 5,300. We are the only research intensive university in South Texas and are ranked in the top 13 percent of all institutions worldwide receiving National Institutes of Health (NIH) funding. In 2015, we had a \$157.5M portfolio in research and other sponsored programs. We are ranked second in Texas for aging research funding from the National Institute on Aging (NIA) and have earned an international reputation in Longevity and Aging Studies. Additionally, since 2007, we manage a National Cancer Institute (NCI) designated Cancer Center, the Cancer Therapy & Research Center (CTRC), where we conduct clinical research trials, foster drug development and provide patient healthcare. At our Greehey Children's Cancer Research Institute (GCCRI), we specialize in children's cancer research. In 2015, we provided an excess of \$8.7M of uncompensated healthcare to uninsured and underinsured populations of San Antonio and South Texas. We are the leading economic generator in our city's \$30.6 billion a year in the biosciences and healthcare industry. Two of our leading discoveries that changed the world were the Palmaz Stent, used to treat over 2 million patients per year worldwide, and the Titanium Rib, an FDA-approved lung sparing device for children with chest wall deformities. In May 2016, our clinical programs (diabetes, endocrinology, geriatrics, nephrology, orthopedics, and urology) were cited as among the best according to the U.S. News & World Report. We offer joint degree programs with the University of Texas at San Antonio (UTSA), UT Health Houston, and with the University of Texas at Austin, and we continue to explore joint degree programs with Texas A&M International University (TAMIU), as well as offer collaborative programs with UT Health Houston's School of Public Health.

In the late 1990s, the Texas Legislature charged us with the responsibility to serve the South Texas Border Region. Beginning with the 75th, SB606 authorized the creation of the Regional Academic Health Center (RAHC) in the Rio Grande Valley (RGV) with the purpose to expand professional health education under the auspices of our School of Medicine. With support from the Texas Legislature and UT System, we opened the initial RAHC education building in Harlingen in June 2002. In 2006, we opened the RAHC's basic research building in Edinburg adjacent to the UT Pan American campus. We opened the second building in Harlingen for Academic & Clinical Research in 2007 and a simulation teaching hospital in Harlingen in May 2014 to serve the RGV's undergraduate and graduate students. Given the highly impactful successes of the RAHC, the 81st (SB98) authorized the establishment of a stand-alone medical school and health science center in the Lower RGV. The 83rd enacted SB24/HB1000 and authorized the creation of the new general academic institution, University of Texas Rio Grande Valley (UTRGV), to include the full integration of the RAHC into the UTRGV as its School of Medicine effective September 2016. The final cohort of the UTHSCSA South Texas Clinical Track (STCT) students will complete their medical training in 2019.

In 1999, the 76th further expanded our responsibilities to Laredo by authorizing through SB1288 the creation of the Regional Campus Laredo (RCL) for the purpose of providing professional health education opportunities and performing health-related scientific research in Laredo and the surrounding communities. We continue our commitment to meeting community-defined clinical and educational training needs in this historically underserved region of Texas.

2. Key Funding Issues

Our five schools depend on the General Revenue (GR) investments of the Texas Legislature's formula-driven appropriations to its health related institutions (HRIs), selected non-formula special items, and the related debt service associated with authorized Tuition Revenue Bonds (TRBs) to educate and train over 3,100 students annually who join Texas' healthcare workforce; to support our faculty's biomedical research; and to provide healthcare to thousands of Texans. The formula-driven funding recommendations developed and submitted to the Legislature by the Texas Higher Education Coordinating Board (THECB) in collaboration with Texas' HRIs

745 The University of Texas Health Science Center at San Antonio

through its Formula Advisory Committee (FAC), are designed to support our missions specifically by funding instruction and operations (I&O), infrastructure, research, and graduate medical education (GME) associated with residency programs to enable us to sustain and/or increase student enrollment levels, recruit quality faculty, and deliver services in adequately equipped facilities within our schools. GR also helps us secure extramural funding, helping us improve our research and clinical enterprises targeting the medically underserved. Success in meeting our various legislative missions and attaining performance measure targets is dependent on adequate and sustainable formula funding allocations each session. Our university is grateful to the 84th for authorizing TRBs (HB100) to fund capital projects that will allow us to renovate and repurpose antiquated space in the 40-yr old buildings housing our medical, dental, and nursing schools.

In response to budget policy directives, we applied a targeted approach to trim 4% from our non-formula base budget (\$1.4M). Areas impacted by this reduction include residency training, health education, health promotion/outreach, and collaborative biomedical research benefiting underserved areas in the Laredo and South Texas border regions. If the 4% reduction is applied to current formula funding levels, and additional \$8.3M would be suffered and greatly impair the ability to carry out our missions. The exercise to cut an additional 10% of non-formula base budget (\$3.3M) was applied across the board to all strategies. If the 10% reduction exercise is applied to current formula funding levels, an additional \$20.1M would be inflicted. Both reductions potentially impact our base formula and non-formula funding levels by \$33.1M and will significantly impede growth and diminish all programs in the health professions. These reduction will greatly impact our workforce capacity in terms of retaining and recruiting quality trained healthcare professionals associated with premier academic programs and research activities, resulting in a potential reduction of students and program closures that will compound the healthcare workforce shortage. Conversely, the continued investment of GR in HRIs will result in an exponential economic return to the State through increased extramural funding, improved clinical care and health outcomes targeting the medically underserved.

The Patient Protection and Affordable Care Act (ACA) presented its challenges in our efforts to produce Texas' healthcare workforce. GR supporting the escalating GME costs and expanding residency program slots in Texas are important to meet this need and grow the medical student body. Given lower Medicaid reimbursement rates, our faculty physicians will likely continue to serve a disproportionate share of uninsured and underinsured patients. It is important that Texas Health and Human Services Commission (HHSC) continue the 1115 waiver program such that our physician practice plan resources can draw and match federal funds to improve patient care and health outcomes for the communities we serve. Additionally, the anticipated 1332 waiver program being developed by HHSC for submission to CMS, effective in 2017, will have major implications to clinical care and operations reimbursement revenue, the effect of which is currently unknown.

3. Faculty & Staff

Attracting and retaining outstanding faculty and staff depends on three key factors: the opportunity to advance professionally; competitive, market-driven compensation; and first rate facilities. Our well-respected reputation in academia supports our ability to fill faculty and staff vacancies by drawing large numbers of national applicants. Operating with less GR makes it more challenging to retain and recruit high caliber personnel. UTHSCSA has experienced an average turnover rate of 15.6% over the past five years. The loss of competent and experienced professionals and a corresponding erosion of the funding that support these employees make it challenging to accomplish our goals. Stable formula funding allocations help us retain, recruit, and support faculty and staff salaries to maintain our current momentum in order to contribute to the healthcare workforce in Texas.

4. Facilities

We face significant financial challenges related to capital investments with a deferred maintenance back log of \$35M and a space deficit of 224,440-sf, as reported to the THECB. We have improved our financial condition overall, but remain unable to sufficiently address infrastructure and technology needs associated with educational programs and research activities due to limited and restricted resources. The buildings that house our medical and dental schools are the oldest buildings on our main campus and in dire need of major renovations. Built in 1968 and 1978, these two buildings total 1.3 million sf and comprise almost 30% of our space. Our nursing school building is over 40 years old. Although expanded in 1996, it quickly became obsolete due to increased student enrollments levels and changing curriculum delivery methods. To continue fulfilling our missions, we identified \$130M of critical repairs to these buildings in preparation for the 84th session, requesting \$114M paid

745 The University of Texas Health Science Center at San Antonio

through an authorized TRB issuance with GR appropriations to cover the \$9.9M in related annual debt service. The 84th enacted HB100 authorizing TRBs for capital projects, awarding us \$80M in bonding capacity and the GR for debt service to renovate our buildings. We will invest \$10M of reserves and have received \$6M in Permanent University Funds (PUF) from the UT System to support this effort.

5. Education

The School of Medicine (SOM) curriculum is designed to improve the clinical competency of students and introduces such topics as medical ethics, preventive medicine, health disparities, and a MD/PhD track to educate future physicians and faculty. Course materials are enhanced with computer based instruction, patient simulations, standardized patient models, and small group discussions. A new curriculum was implemented for the 2013 entering class that promotes integrated, active and engaged learning in accordance with the LCME accreditation standards. Our SOM's planned enrollment level for 2014-15, 2015-16, and 2016-17 will be at 225 students, with 15 students committed to completing their 3rd and 4th years at the UTRGV School of Medicine's RAHC campuses and matched for residency purposes as the South Texas Clinical Track (STCT). These STCT students will finish their medical training in 2019. Enhancing GME formula funding will be an important means of enhancing the number of physicians ultimately practicing in South Texas and around the State. In an effort to assist underserved areas, our SOM has an affiliated agreement with the South Texas Veterans Health Care System (STVHCS) to train up to 10 medical students through clinical rotations at the VA's Outpatient Clinic in Laredo, beginning with three students in Fall 2016.

The School of Dentistry (SOD), one of the top ten in the nation, has fully implemented a new curriculum which emphasizes lifelong learning. Clinical management systems are utilized in the dental outpatient clinic to meet student educational needs. The Center for Oral Healthcare and Research (COHR) adjacent to the Medical Ambulatory Research Center (MARC) was constructed with PUF proceeds and opened in 2015 as the clinical home for our students' dental practice. At 198,000-sf, the COHR includes state-of-the-art dental equipment, streamlined clinical practices, efficiently delivered oral healthcare, and the education of our dental students. The SOD addresses the critical need for clinicians/scientists pursuing academic careers through a DDS/PhD program and is developing a community-based clinical dentistry training program for undergraduate and graduate dental students through a Denta! Regional Program provided at our RCL. The SOD also oversees dental student clinical rotations and dental health professional training programs in the Lower RGV as part of the SOD's Dental Education Outreach Network, designed to link dentally underserved in the community with dental health professionals.

The School of Nursing (SON) continues to respond to the critical need for nurses and faculty by increasing both undergraduate and graduate enrollment. In the last five years, our SON has grown undergraduate enrollment by 65%. GR will continue to sustain nursing enrollment levels throughout the 2018-19 biennium by adopting the THECB's formula funding recommendations for HRIs in support of nursing education. The SON is actively addressing the decline in Nursing Faculty by expanding enrollment in both MSN and PhD programs and the doctorate of nursing practice (DNP) program that began in the fall 2012. In 2016, U.S. News and World Report ranked our SON's master's degree program as one of the top 100 programs (tied for 88th). Additionally, the young DNP program tied at 68th. If GR is not increased through formula allocations, enrollment in our nursing programs will be reduced.

The Graduate School of Biomedical Sciences (GSBS) provides an excellent opportunity to train young scientists to address the healthcare needs within San Antonio and South Texas. The school has made major efforts to increase the number of young people from South Texas entering careers in biomedical research. Enhanced research funding will facilitate the continued development of joint master's and doctoral degree programs with UTSA in the areas of bioinformatics, clinical bioengineering, neurosciences, and communication hearing disorders. In 2014, the U.S. News and World Report ranked the UTSA-UTHSCSA joint Graduate Programs in Biomedical Engineering 55 out of 107 among biomedical engineering programs.

The School of Health Professions (SHP) offers bachelor's degrees in Clinical Laboratory Sciences, Cytogenetic, Emergency Health Science, and Respiratory Care. Our graduate programs include master's degrees in Clinical Laboratory Sciences/Forensic Toxicology, Occupational Therapy, and a doctorate in Physical Therapy. In 2016,

745 The University of Texas Health Science Center at San Antonio

the U.S. News and World Report ranked the Physician Assistant program at 33 (tied) out of 154. Additional programs include post baccalaureate certificates in Clinical Laboratory Sciences and certificates in Basic EMT and Paramedic.

6. Research

In FY15, we had a \$157.5M portfolio in research and other sponsored research programs. Our mission commits the institution to a major role in the discovery of new biomedical knowledge and the search for answers to healthcare needs. To that end, we have set strategic objectives to establish new and strengthen ongoing research initiatives in aging, cancer, neurosciences and stem cell research. GR will continue to help us maximize research productivity by updating our space, technology, databases, and other resources. This includes concentration on diseases that have a disproportionately high incidence in the San Antonio and South Texas. CPRIT grant awards continue to sustain and further the progress of the renowned CTRC and the GCCRI to support the enhancement of these programs for our clinical, translational and basic research activities. To date, UTHSCSA has been awarded more than \$65M in CPRIT grants. UTHSCSA supports the continued funding of CPRIT by the 85th. The landscape of our campus and the South Texas Medical Center is quickly evolving into a dynamic panorama of unparalleled scientific discovery. At the center of this transformation is the South Texas Research Facility (STRF). Opened in 2011, the impressive three-story, 190,000-sf building houses our growing research enterprise that will accelerate the translation of basic research discoveries into new treatments and cures that will save lives. With the STRF, our impact on the future of health is powerful and far reaching. The robust research environment at the STRF complements our nearby patient-centered facilities including the Medical Arts & Research Center (MARC), the home for the SOM's clinical outpatient practice (UT Medicine San Antonio); the COHR, the new clinical home for our students' dental practice that opened in 2015; as well as the CTRC and the GCCRI. Core research programs housed in the STRF include: Adult Cancer, Neurosciences, Molecular Medicine, Microbiology, I-CAIR, and the Center for Healthy Aging and Institute for Integration of Medicine and Science. Additionally, our Office of Technology Commercialization (OTC) operates to foster innovation and entrepreneurship among faculty, staff and trainees and generate new ventures leading to job creation that will positively impact Texas' economy.

7. Partnerships

UTHSCSA has excelled at fostering collaborative resourcing through innovative partnerships with business, industry, education, government, and the military. The 77th (HB1716) created the San Antonio Life Sciences Institute (SALSI) to facilitate collaboration and joint research and degree programs between UTHSCSA and UTSA. The program is designed to build on the scientific interactions and cooperation between our biomedical engineering and clinical scientists and UTSA's engineering and basic science faculty. The newly created Translational Science PhD program with UTSA, UT Health Houston, and UT Austin is one example of a joint degree program. UTSA and UTHSCSA have also worked together to consolidate the degree program in Nutrition with the program moving to UTSA in September 2012. Examples of synergy in joint research include areas in neurosciences, computational biology and metabolic biology including the study of diabetes, which is so prevalent in South Texas. Recognizing the importance of SALSI, in 2003 the UT System, UTHSCSA, and UTSA invested \$4.5M in the SALSI, thereby initiating several joint research and educational programs between these two institutions. The \$4M renewal of special item funding for SALSI will help us continue our momentum and successful collaborative efforts.

8. Exceptional Items Requests

*Barshop Institute for Aging Studies

Over the past 25 years, UTHSCSA has developed an internationally recognized research program in basic biomedical research on aging. As such, the Barshop was recently ranked #2 in Texas for aging research by the National Institute on Aging. Created in 1998, the Barshop Institute for Longevity and Aging Studies, has recruited scientific leaders in aging research from all over the world. The Institute has received \$4M in special item funding from the 83rd and 84th to continue our aging research and develop a Translational Aging Research Program, taking scientific discoveries made in the laboratory to patients. Health problems of aging Americans will dominate the exploding medical costs in the 21st century. Aging is, overwhelmingly, the #1 risk factor for our top causes of death (heart disease, cancer, stroke, respiratory disease, diabetes and Alzheimer's disease), disability, and loss of the capacity for independent living. In treating the underlying causes of aging, the prospect of a more cost

745 The University of Texas Health Science Center at San Antonio

effective approach to significantly extending the disease free period of human health is enhanced. Continued state funding over the 2018-19 biennium for this initiative ensures we remain at the forefront of discoveries which could save billions of dollars in healthcare expenses and improve the quality of life for many Texans. Additionally, we request enhanced funding from the 85th of \$5M to expand the infrastructure of this program that will allow us to reach more participants that may benefit from the clinical research and health-promoting activities conducted by this Translational Research Program. The support will allow us to expand into Military Health and to sustain a subject registry and repository, create community research teams, maintain data management platforms, modernize our translational research infrastructure, train new faculty, and attract the best scientists to Texas. UTHSCSA has a significant and solid foundation in both clinical and neuroscience research upon which to build, in addition to a vast array of internal programs and external partnerships in this important area of our region's health. Of these, our membership in the Texas Alzheimer's Research and Care Consortium (TARCC), a collaboration between six of Texas' leading medical research institutions to improve early diagnosis, treatment, and prevention of Alzheimer's Disease (AD), is notable as it reflects our dedication and intellectual resources and capacity to join other academic institutions in finding life-saving treatments and cures for AD patients and their families.

***Regional Campus Laredo (RCL)**

The 76th SB1288 established the RCL as a beacon for health professional education, research, and service for Laredo and surrounding communities in the areas of undergraduate, graduate, and research to meet the educational and healthcare needs of the medically underserved Texans in this area of the state. The RCL currently receives special item funding to support dental and allied health programs, which include bilingual, dual, and joint degree programs with TAMU in professional health, as well as other community programs that promote awareness and increase access to healthcare to the citizens of Laredo and the surrounding communities. Continued state funding ensures basic healthcare needs are addressed in this region. We are seeking \$2.9M of enhanced funding to provide targeted "pipeline" activities that will increase diversity in the dental and allied dental professions, grow student enrichment programs that promote an interest in health careers, develop professional health degree programs geared towards nontraditional students and/or post graduate students, to expand the existing Pediatric Dentistry residency training program and to reestablish the Physician's Assistant clinical training program in Laredo. Furthermore, Laredo and the Webb County region represents a young population with disproportionate number of residents living below poverty with limited healthcare access and a low level of education. This region is designated as medically underserved with a shortage of well-trained health professionals and an abundance of health challenges. This region also represents one of the fastest growing areas of Texas, pivotally located for international trade. Yet the explosive growth of this region has widened the gap between healthcare professionals and community needs. There is crucial need to establish and expand local health training programs, further develop community-based research and support outreach services at this campus. Stable program leadership, rapidly increasing demands of student applicants, and demand by physicians to employ PAs demonstrate the need to expand the San Antonio-based PA program to the RCL. Additionally, the SOD continues to provide academic programs and community services in Laredo via the RCL to serve the ever-increasing community demands for more educational opportunities and patient care. Current RCL programs include a pediatric dental residency program, specialty periodontics and prosthodontics training and treatment, general dentistry rotations, and continuing education to the Laredo healthcare community. UTHSCSA proposes to increase by 2 the number of pediatric dental residents to provide a required clinical clerkship for seniors students at the Laredo Health Department, starting in Fall 2016; to implement a required dental hygiene rotation for senior students at the Laredo Health Department starting Fall 2016; to establish affiliation agreements with federally qualified health centers in Eagle Pass, Del Rio and Uvalde to implement clinical rotations for senior dental students (housing will need to be identified); and, to establish partnerships with organizations focused on providing primary dental care to uninsured families in Del Rio, Eagle Pass, Laredo, El Cenizo, and Rio Bravo. There are tentative plans for our SOD to explore affiliation agreements with the South Texas Veterans Health Care System (STVHCS) to train dental students through clinical rotations at the VA Outpatient Clinic in Laredo.

***Outreach Support-South Texas Programs**

UTHSCSA is well positioned to leverage its strong connections with the community and networks of primary care physician practices to facilitate the access of our patient data to clinician investigators for research purposes. We are seeking \$3.35M of enhanced funding from the 85th to continue our successful programs. Expanding the mission of South Texas Outreach Programs to include health education programs such as the South Texas Childhood Obesity Initiative and maintain a data registry

745 The University of Texas Health Science Center at San Antonio

system for this region of the State is gravely needed. Access to Electronic Health Records (EHR) of primary care facilities in South Texas will make patient data available for research purposes throughout UT System, thereby developing a state-wide "medical informatics network" (a patient data warehouse) for large scale studies aimed at improving population health, health outcomes and new evidence-based health policies that can positively impact clinical practice. With consent, we can develop a Research Registry of individuals from South Texas willing to participate in clinical studies and make their demographic, health and health history data available to a broader research community. Mobile Lab Clinics could be developed to provide healthcare services to populations in rural areas (e.g., measures of blood pressure, cholesterol, diabetes, body weight) and connect the EHR of these mobile units to the "network" to use for research projects. In addition, our dental school provides educational, rotational, and community services in the Lower Rio Grande Valley (Harlingen, Brownsville, and Raymondville) to serve the ever increasing community demands for more healthcare. Partnerships with Federally Qualified Health Centers (FQHCs) will be required to provide clinical and outreach training. The SOD also seeks to establish affiliations with other FQHC clinics, school districts and community organizations in Hidalgo (San Juan, Mission) and Starr (Rio Grande City, Roma) counties.

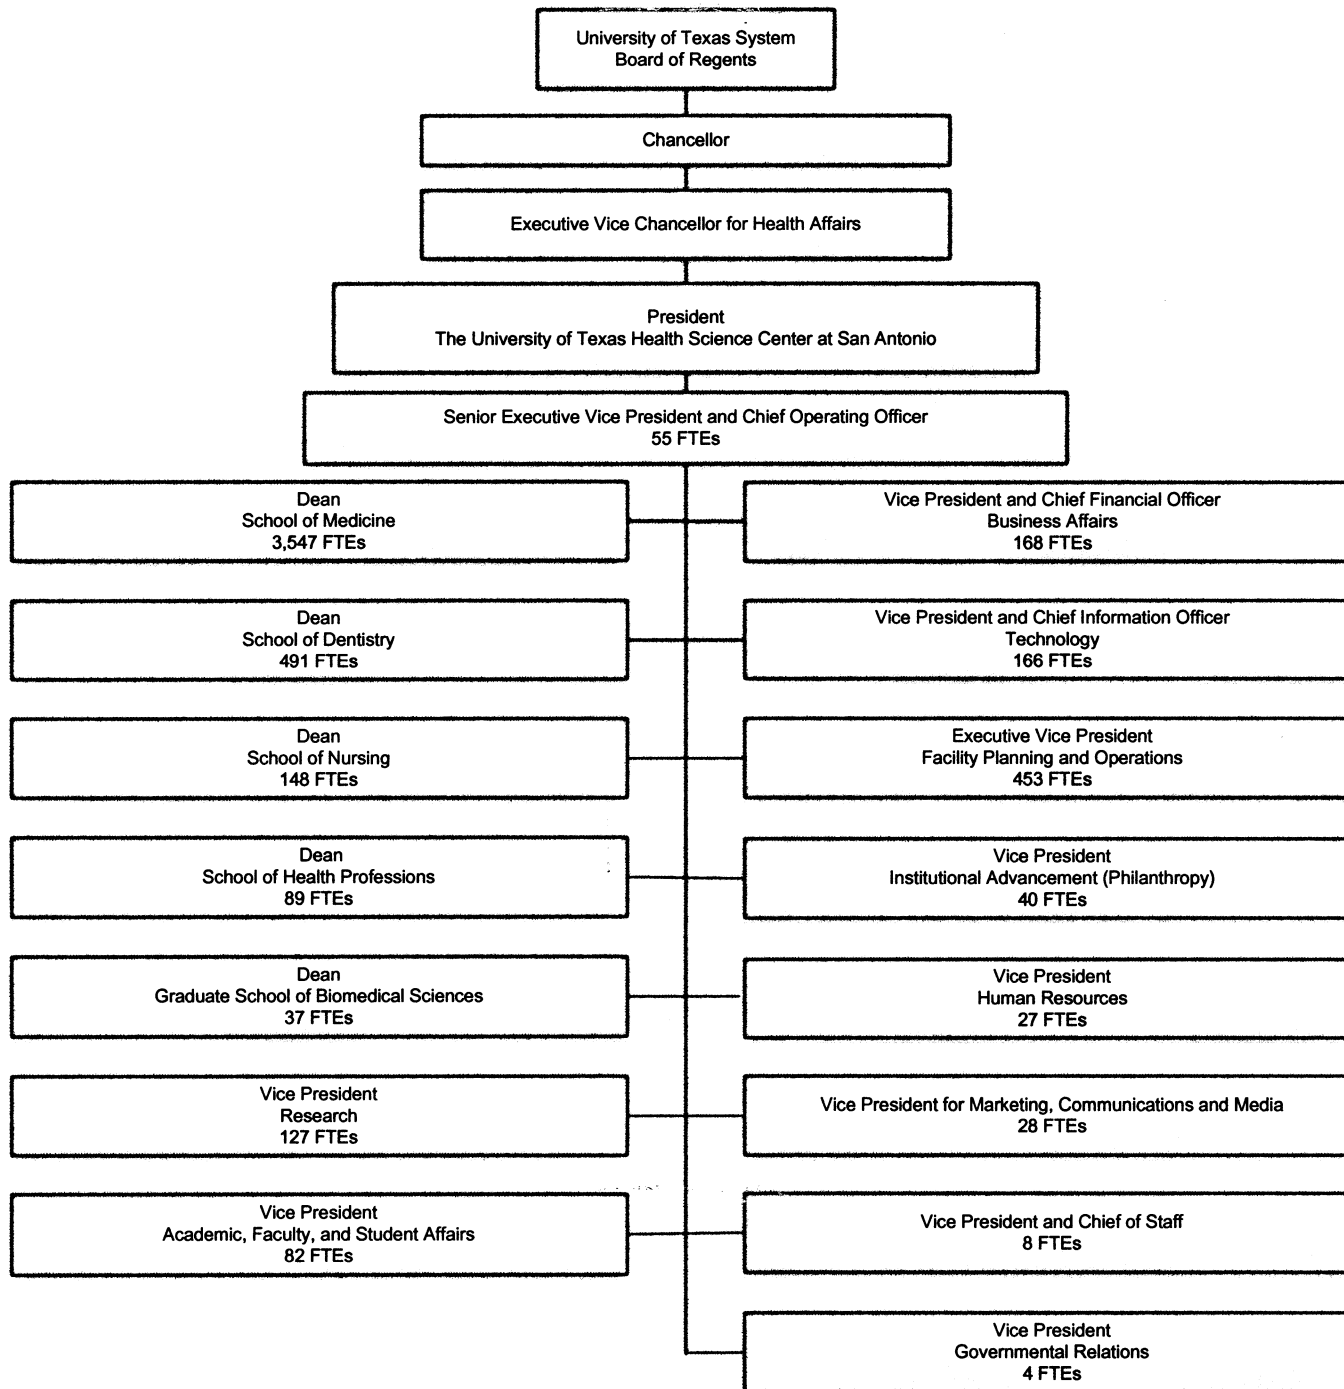

***San Antonio Life Sciences Institute (SALSI)**

The UTHSCSA renews its \$4M special item need for SALSI in the 2018-19 biennium to help us continue our momentum and successful collaborative efforts with our various partners. SALSI's mission is to bring together expertise to collaborate on joint studies that significantly contribute to solutions for challenges facing healthcare in Texas and around the nation. SALSI will achieve its mission through faculty development programs, shared resources (e.g., core laboratories) and collaborative funding mechanisms. These are challenging times in research and research education. The strategy to meet these challenges is via strong collaborative efforts that bring multiple factions and viewpoints to a common cause. The past SALSI efforts have helped both UTSA and UTHSCSA make great strides in their missions and has benefited San Antonio, South Texas, and beyond. With this critical mass in place, and the formation of a SALSI Academy, we are proposing to not only strengthen the bridges we have built over the past decade, but to build new ones. The past legislative funds, as well as internal and philanthropic contributions, provided to the UTHSCSA-UTSA joint efforts have created multiple pillars upon which we will continue to build with new innovative initiatives.

9. Summary

The UTHSCSA endorses the THECB's HRI FAC's Formula Funding recommendations to the 85th, which would provide enhanced funding for Instruction and Operations, Research, and Infrastructure in the 2018-19 biennium. We also support additional increases in GR funding for GME, and bonding authority for needed campus capital projects along with the associated debt service, should general revenue be made available for such purposes. We remain dedicated to focusing resources on educational efforts and disease-related clinical and life sciences research that address the critical healthcare needs in San Antonio and the South Texas border regions.

Security sensitive positions are restricted to those described in TEC §51.215 and TGC §411.094. The President has designated all positions at UTHSCSA as being security sensitive. In accordance with UT System policy, criminal history record information will be obtained on all finalists considered for appointment to a security sensitive position. Criminal history record information is not re-obtained for current employees when reclassifications, promotions, or career progressions occur.

Budget Overview - Biennial Amounts
85th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

745 The University of Texas Health Science Center at San Antonio
Appropriation Years: 2018-19

	GENERAL REVENUE FUNDS		GR DEDICATED		FEDERAL FUNDS		OTHER FUNDS		ALL FUNDS		EXCEPTIONAL ITEM FUNDS
	2016-17	2018-19	2016-17	2018-19	2016-17	2018-19	2016-17	2018-19	2016-17	2018-19	2018-19
Goal: 1. Provide Instructional and Operations Support											
1.1.1. Medical Education	80,777,061		5,520,594						86,297,655		
1.1.2. Dental Education	54,353,917		3,508,869						57,862,786		
1.1.3. Biomedical Sciences Training	6,333,226		826,628						7,159,854		
1.1.4. Allied Health Professions Training	6,817,394		2,921,050						9,738,444		
1.1.5. Nursing Education	14,651,338		1,164,002						15,815,340		
1.1.6. Graduate Medical Education	7,365,262								7,365,262		
1.2.1. Staff Group Insurance Premiums			2,744,074	3,028,925					2,744,074	3,028,925	
1.2.2. Workers' Compensation Insurance	432,742	385,614							432,742	385,614	
1.2.3. Unemployment Insurance	183,422	176,086							183,422	176,086	
1.3.1. Texas Public Education Grants			3,250,000	3,300,000					3,250,000	3,300,000	
1.3.3. Dental Loans			97,500	100,000					97,500	100,000

--	-------------	-------------	-------------	-----	-----

Comments: The FY 2016-2017 LAR was submitted with no estimate for Board Authorized Tuition in FY 2015. Subsequent to submission, UTHSCSA received approval from the UT System Board of Regents and the THECB to expand programs, which generated actual Board Authorized Tuition of \$2.07M for FY 2015. The enrollment levels for programs that UTHSCSA was successful in adding exceeded the amount that was initially estimated and is anticipated to generate equivalent BAT levels in FY 2016 and 2017.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted medical student headcounts. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted nursing student full time equivalent. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2018-19 because amounts are not determined by institutions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The School of Dentistry's predoctoral clinical education and training programs primarily occur in clinics operated by the school. It is in these clinics that dental students acquire the skills and demonstrate the knowledge and values necessary to be deemed competent and ready to provide independent oral health care for the citizens of Texas.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The School of Dentistry's budget for clinical training is increasingly stressed by rising operating costs (staff and supplies) and demand for services from a population that is increasingly older and medically compromised. In addition, technological advances that must be incorporated into the student training program to ensure the currency of our graduates is expensive.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The 75th (SB606) authorized the UT System to establish medical education and research programs serving deep South Texas. The UT System Board of Regents assigned the management of these programs as the RAHC to the UTHSCSA with the exception of public health (to UTHSCH). Ambulatory education programs are conducted at numerous community-based healthcare facilities in Cameron, Hidalgo, Starr, and Willacy counties. Basic/clinical research targets diabetes and emerging, infectious, and other chronic diseases that disproportionately affect populations along the US/Mexico border.

The 81st (SB98) established a stand-alone health science center and medical school in South Texas that was subsequently incorporated into the UT Rio Grande Valley (UTRGV) during the 83rd (HB100/SB24). The intention was to establish the new medical school under UTRGV and transition the funding and facilities of the existing RAHC for the Harlingen/Edinburg campuses from UTHSCSA to UTRGV. During the 84th, with full agreement from UT System, UTHSCSA and UTRGV, \$31.4M of current GR (E.1.1-RAHC \$30.6M and E.2.1-Family Practice Residency \$0.8M) was moved from the UTHSCSA bill pattern and added to UTRGV beginning with the 2016-17 biennium. Tobacco funds appropriated to UT System and designated for the RAHC (\$1.2M) were also redirected from UTHSCSA to UTRGV so that \$32.6M of GR became available to UTRGV to support existing operations.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

3.A. Strategy Request
 85th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

Base appropriation funding for both the RAHC and the Family Practice Residency Training Program strategies in the combined amount of \$15,698,950/yr was transferred from UTHSCSA and incorporated into the overall budget needs for UTRGV to support the new medical school initiatives as reflected in the 2016-2017 bill pattern structure for UTRGV.

In order to transition operations of the RAHC from UTHSCSA to UTRGV as the new medical school, an interagency service contract was executed between the two institutions. Amounts for 2016 and 2017 reflect the estimated contract amounts required to support the services provided by UTHSCSA to UTRGV. It is anticipated that some level of contracted services will be needed in 2018 and 2019, but no amounts have been reflected as contract negotiations for these years have yet to commence.

Schedule 9 has not been prepared for this Special Item strategy. Additional information related to this strategy can be found in the Legislative Appropriations Request for UTRGV.

STRATEGY DESCRIPTION AND JUSTIFICATION:

UTHSCSA's Regional Campus in Laredo (RCL), authorized by the 76th Texas legislature (SB1288, Zaffirini/Cuellar), was developed to provide remote health professional education resources to meet community-defined health professional education and clinical training needs in the Laredo area. The D.D. Hachar Administrative building and the academic building are currently supporting a variety of health professional training programs in medical, dental, health professions and public health education. The goals are 1) establishment of graduate level health professions programs to increase the quality and numbers of health professionals in the region; 2) development of research programs that combine community-based participatory translational research with an active community advisory board to address the epidemic of diabetes and obesity and other major health concerns that impact the health and wellness of the region; 3) provision mini grants to motivated high school and college students interested in hands-on research; 4) engaging high school and college students in pipeline programs that will expand the number of qualified applicants eligible to enroll in graduate programs; 5) fostering active community participation in order to develop a healthier Laredo, better educated and committed to improving their quality of life; and 6) linking the RCL with other HSC campuses and South Texas academic institutions to enhance student opportunities through distance education technology.

The Formula Funding equation does not include funding for administrative costs required to provide infrastructure support to programs such as the Regional Campus in Laredo (RCL), the Podiatry Residency training program, the and the San Antonio Life Sciences Institute (SALSI) funded as Special Items. This required the UTHSCSA to subsidize administrative support for these programs through the General Revenue funding provided to core mission-based operations. These programs have made positive impacts on healthcare and education in San Antonio and the South Texas border regions. As these programs continue to flourish, the cost of providing core infrastructure support to Special Item programs in San Antonio and South Texas out-pace any infrastructure funding provided through the formula funding mechanism. The 77th Legislature recognized this formula funding deficiency and appropriated funding for Outreach Support to cover administrative and infrastructure costs for Special Item programs, such as the Regional Campus in Laredo. The distance between the main campus in San Antonio and the regional campus and satellite clinics in the border regions is predominately causing the need for separate infrastructure support for these established and growing programs and facilities in South Texas.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available on Schedule 9, Special Item Information.

FULL TIME EQUIVALENT POSITIONS:		7.2	0.0	0.0	0.0	0.0

STRATEGY DESCRIPTION AND JUSTIFICATION:

The purpose of the Family Practice Residency Training Program is to provide training to family practice resident physicians, as well as third and fourth year medical students in order to address the shortage of primary care physicians in San Antonio and throughout South Texas.

Because much of the efforts associated with this residency training program are conducted in close proximity to and in conjunction with the Regional Academic Health Center (RAHC) activities, namely at the McAllen Medical Center, the base appropriation funding levels were incorporated into the overall budget needs for the new medical school at the University of Texas Rio Grande Valley (UTRGV). Thus, biennial base appropriations for this special item in the amount of \$805,378 were consolidated with RAHC funding and transferred from UTHSCSA to UTRGV to support the new medical school initiatives as reflected in the 2016-2017 bill pattern structure for UTRGV.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Schedule 9 has not been prepared for this Special Item strategy. Additional information related to this strategy can be found in the Legislative Appropriations Request for UTRGV.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The purpose of the Podiatry Residency Training Program is to improve the supply of podiatrists and expand outreach clinics for foot care to the population of South Texas to treat predominately diabetic induced foot ulcers and to teach state of the art treatment options that preclude amputation. This program participates in the Area Health Education Council and South Texas Border Initiative, and addresses the shortage of foot care physicians and the high incidence of diabetes and its complications in the South Texas/Border region area.

STRATEGY DESCRIPTION AND JUSTIFICATION:

During the 2000-2001 biennium, UTHSCSA assumed responsibility for operation of the Medical (Mycobacterial) Mycology Research Laboratory (MMRL) previously located at the Texas Center for Infectious Diseases in San Antonio. Personnel and operating funds have been assumed by the UTHSCSA, and continued funding to support this program is necessary to sustain the current level of activity. San Antonio is internationally recognized for its excellence in medical mycology. There are five principal investigators across multiple departments at UTHSCSA and in recent years, UTSA has grown from two mycologists to five. This collaboration has resulted in the creation of the San Antonio Center for Medical Mycology (SCMM), which is now in its 11th year and whose members possess expertise in a wide range of research areas from fungal clinical studies/diagnostics to basic science studies on a variety of fungal pathogens. SCMM is also affiliated with the UTHSCSA Fungus Testing Laboratory (FTL), a College of American Pathologists (CAP) and Clinical Laboratory Improvement Amendments (CLIA) certified international reference laboratory which provides diagnostic services for national and international entities, and trains mycologists from all over the world. This special item functions to significantly strengthen the development of joint collaborative research and training programs in conjunction with SCMM and our sister institution UTSA.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Generation of new knowledge, technology and innovation is a critical catalyst for the growth, development and well-being of our state. Recognizing this, Sen. Leticia Van de Putte and Rep. Robert Puente, supported by the Bexar County delegation, authored SB 728 and HB1716 during the 77th session to authorize the creation of the San Antonio Life Sciences Institute (SALSI). This institute was designed to: 1) facilitate the establishment of collaborative activities between public and private institutions that would lead to the overall enhancement of their research, teaching and service missions; 2) promote collaboration (joint doctoral programs, research projects) between these institutions; and 3) foster workforce development as well as innovation and commercialization initiatives to stimulate the growth of the biomedical and biotechnology industries in San Antonio and South Texas. SALSI's goal is to develop synergies in research and education to exceed exponentially the efforts of the institutions if acting unilaterally. The response over the past 12 years from faculty, students and postdoctoral trainees to the SALSI's mission has been outstanding. The framework SALSI created has not only substantially and synergistically enhanced the relationship between the UTHSCSA and UTSA, but has strengthened research collaborations with area institutional research partners -Texas Biomedical Research Institute, Southwest Research Institute, San Antonio Military Health System.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Providing quality health care for an increasing number of elderly citizens will become one of the major needs facing the public sector in this century because per capita expenditures for health care costs for the elderly are disproportionately high, especially the oldest old (e.g., individuals over 80 years of age). The incidence of cancer, Alzheimer's disease, cardiovascular disease, and diabetes will also increase as our population ages. Therefore, it is universally recognized that increased spending for research in aging is one of the most important strategies in reducing health-care costs by improving the health of the elderly and in enhancing their contributions to our work force and society. Research emanating from the Barshop Institute for Longevity and Aging Studies will improve the quality of life for the growing numbers of elderly people in Texas and the United States.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available on Schedule 9, Special Item Information.

CODE	DESCRIPTION	Exp 2015	Est 2016	Bud 2017	BL 2018	BL 2019
------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

Initial funding for this strategy was legislatively provided in the 2000-01 biennium to support the growth and expansion of existing and new programs both in South Texas and San Antonio locations, and to address salary competitiveness issues. Funds also flowing through this strategy, commonly referred to as Article III, Section 56 funding, represents the partial restoration of a 12.5% General Revenue budget reduction experienced during the 2004-05 biennium and enacted by the 78th Legislature for health-related higher education institutions. At the recommendation of the LBB, these funds were allocated to Institutional Enhancement in the 2006-07 biennium since the restoration was related to formula strategies and operations at the main campuses in San Antonio. This strategy also includes funds from the restructuring of the South Texas Professional Education special item strategy that was consolidated into the 2008-09 baseline requests for the RAHC, the Regional Campus-Laredo (RCL), and the main campuses in San Antonio during the 2008-09 biennium as authorized by the 80th Legislature. The portion of the STPE supporting the main campuses in San Antonio was allocated to Institutional Enhancement. This special item was legislatively provided because formula pools have been significantly reduced and are significantly underfunded to cover the actual costs of instruction, research and space support. These funds support the costs of the UTHSCSA's core missions.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Additional information for this strategy is available on Schedule 9, Special Item Information.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Funding for this strategy is derived from annual distributions of this institution’s permanent endowment fund as established by Section 63.101 of the Texas Education Code. These are appropriated for research and other programs that are conducted by the institution and that benefit the public health or for state matching funds for the eminent scholars fund program. Funds may be used to establish, maintain, operate, and support a children’s cancer center and related research at its campuses, including the campus extension in the city of Laredo, as authorized by Section 63.102 (c) of the Texas Education Code.

DESCRIPTION / JUSTIFICATION:

UTHSCSA Barshop Institute researchers and health care providers have created a Translational Aging Research Program to test and develop interventions to promote healthy aging. Various lifestyle (e.g. nutrition, physical activity, etc.) and pharmacologic (rapamycin, metformin, acarbose, etc.) interventions that are likely have a beneficial impact on aging and associated diseases (Alzheimer's, diabetes, cancer) are being evaluated. The Barshop Institute of UTHSCSA requests further enhanced funding from the 85th Texas Legislature to expand the infrastructure of this program that will allow us to reach more participants that may benefit from the clinical research and health-promoting activities conducted by the Translational Research Program. The support will allow us to expand into Military Health and to sustain a subject registry and repository, create community research teams, maintain data management platforms, modernize our translational research infrastructure, train new faculty, and attract the best and the brightest scientists to Texas.

UTHSCSA has a significant and solid foundation in both clinical and neuroscience research upon which to build, in addition to a vast array of internal programs and external partnerships in this important area of our region's health. Of these, the university's membership in the Texas Alzheimer's Research and Care Consortium (TARCC), a collaboration between six of Texas' leading medical research institutions to improve early diagnosis, treatment, and prevention of Alzheimer's Disease (AD), is notable as it reflects the university's dedication and intellectual resources and capacity to join other academic institutions in finding life-saving treatments and cures for AD patients and their families.

The Barshop Institute for Alzheimer and Neurodegenerative Diseases for San Antonio and Central and South Texas will benefit all Texans.

4.A. Exceptional Item Request Schedule
 85th Regular Session, Agency Submission, Version 1
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 8/11/2016
 TIME: 4:40:00PM

Agency code: 745

Agency name:

The University of Texas Health Science Center at San Antonio

CODE	DESCRIPTION	Excp 2018	Excp 2019
------	-------------	-----------	-----------

EXTERNAL/INTERNAL FACTORS:

Enhanced funding in the amount of \$5 million is being requested for the Barshop Institute that has been at the forefront of aging research by rapidly expanding our knowledge on the biology of aging and associated diseases. Funding will support faculty recruitment, enhanced research and the development of clinical trial programs. Low reimbursement rates have precluded previous expansion.

Additional information related to this request is available in Schedule 9, Special Item Information.

DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:

To support the Translational Aging Research Program and expand into Military Health, numerous information technology components will be required to ensure goals and objectives are met. A subject registry and repository system will be needed to maintain, analyze, report and share both research and clinical trial data among collaborators.

IS THIS IT COMPONENT RELATED TO A NEW OR CURRENT PROJECT?

NEW

PROPOSED SOFTWARE EXAMPLES (Client-side, server-side, Midrange and Mainframe)

In all likelihood, the employed software solutions will be a hybrid of commercially available products and custom applications developed with the UTHSCSA. An over-arching goal will be to leverage existing software capability where applicable, while deploying comprehensive solutions that are extensible, compliant, and fiscally sustainable while meeting all operational requirements.

PROPOSED HARDWARE EXAMPLES (Desktop, Laptop, Tablets, Servers, Mainframes, Printers and Monitors)

There will be a need for new hardware acquisition to support the creation and growth of repositories to include network, server, storage, security appliances.

DEVELOPMENT COST AND OTHER COSTS

In assessment phase.

TYPE OF PROJECT

Acquisition and Refresh of Hardware and Software

ALTERNATIVE ANALYSIS

The project will be delayed until sufficient funding can be secured. Collaboration will be significantly impeded making it difficult to collect, compute, analyze, and share data focused on discovery of life-saving treatments related to aging and military health.

ESTIMATED IT COST

2016	2017	2018	2019	2020	2021	2022	Total Over Life of Project
\$0	\$50,000	\$450,000	\$450,000	\$350,000	\$350,000	\$350,000	\$2,000,000

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

UTHSCSA has a strong base in which to build upon the extramural funding needed to conduct the basic neuroscience and aging research activity within the Barshop Institute. Recurring funds, however, will be needed to provide the necessary research administration infrastructure that will allow us to reach more participants that may benefit from the clinical research and health-promoting activities specific to aging conducted by the Translational Research Program. These funds will also allow us to

	FULL-TIME EQUIVALENT POSITIONS (FTE):	10.00	10.00

DESCRIPTION / JUSTIFICATION:

UTHSCSA requests additional funding to support increased student enrollment and to expand educational programs, residency training programs, and rotations.

Laredo and Webb County represent a young population with a disproportionate number living below the poverty level, limited healthcare access, and a low level of education. This region is repeatedly designated as medically underserved with a shortage of health professionals and an abundance of health challenges. It is one of the fastest growing areas of Texas positioned for international trade, which has widened the gap between healthcare professionals and community health needs. There is critical need to reestablish and expand health training programs, further develop community-based research, and support outreach services. Rapidly increasing demand for student positions and demand by physicians to employ physician assistants demonstrate the need to expand the PA program to the Laredo campus.

UTHSCSA's School of Dentistry (SOD) continues to provide academic programs and community services in Laredo via the RCL to serve the ever-increasing community demands for more educational opportunities and patient care. Current RCL programs include a pediatric dental residency program, specialty periodontics and prosthodontics training and treatment, general dentistry rotations, and continuing education to the Laredo healthcare community. UTHSCSA proposes to increase by 2 the number of pediatric dental residents to provide a required clinical clerkship for seniors at the Laredo Health Department starting in Fall 2016; to implement a required dental hygiene rotation for seniors at the Laredo Health Department starting Fall 2016; to establish affiliation agreements with federally qualified health centers in Eagle Pass, Del Rio and Uvalde to implement clinical rotations for seniors; and to establish partnerships with organizations focused on providing primary dental care to uninsured families in these areas.

	FULL-TIME EQUIVALENT POSITIONS (FTE):	5.00	5.00

DESCRIPTION / JUSTIFICATION:

Outreach programs in South Texas play a key role in improving the health status of communities by reducing health disparities due to poverty, access to care, environmental factors, gender and race. UTHSCSA with other state and federal funding has expanded its educational outreach and training into the Lower and Middle Rio Grande Valley through the Institute for Health Promotion Research and the Center for Research to Advance Community Health.

UTHSCSA is well positioned to leverage its strong connections with the community and networks of primary care physicians to facilitate the access of our investigators to patient data for research purposes. Expanding the mission of South TX Outreach to include a data registry accessible to Electronic Health Records (EHR) of primary care facilities in South TX will make patient data available for research purposes and allow the integration of these records within existing data warehouses throughout UT System, thereby developing a state-wide "medical informatics network" (a patient data warehouse) for large scale studies aimed at improving population health, health outcomes and new evidence-based health policies that can positively impact clinical practice. Additionally, a Research Registry of individuals from South TX willing to participate in future clinical studies can be developed to make demographic, health and health history data available to the research community, along with Mobile Lab Clinics that provide healthcare services to populations in rural areas (e.g., measures of blood pressure, cholesterol, diabetes, body weight, etc.) and connect the EHR of these mobile units to the "network" to use for research projects.

In addition to these planned initiatives, our dental school provides educational, rotation and community services in the Lower Rio Grande Valley to serve increasing demands for healthcare. As these programs flourish and provide positive impacts, infrastructure funding is needed to support the growth.

CODE DESCRIPTION

Excp 2018

Excp 2019

EXTERNAL/INTERNAL FACTORS:

Enhanced funding in the amount of \$3,350,000 is being requested to provide the infrastructure necessary to support programs in South Texas not funded through the formula funding equation that have made positive impacts on health care and education in San Antonio and the South Texas region, as well as to broaden the mission and develop a data and research registry to make patient and participant data from connected Electronic Health Records of primary care facilities in South TX available for research purposes thereby developing a state-wide "medical informatics network" (a patient data warehouse) for large scale studies aimed at improving population health, health outcomes and new evidence-based health policies that can positively impact clinical practice, as well as make Mobile Lab Clinics available that provide healthcare services to populations in rural areas and connect the EHR of these mobile units to the " network" to use for research projects.

Additional information related to this request is available in Schedule 9, Special Item Information.

DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:

To facilitate the access of patient data for research purposes, a data registry and repository will be needed to maintain, analyze, report, and network Electronic Health Records (EHR) from primary care facilities in South Texas and Mobile Lab Clinics providing healthcare services in rural areas. Opportunities exist for applying telehealth capability for not only gathering data in these areas, but also in the administration of cutting-edge therapies will improving patient care and quality of life, especially in underserved communities throughout South Texas.

IS THIS IT COMPONENT RELATED TO A NEW OR CURRENT PROJECT?

CURRENT

PROPOSED SOFTWARE EXAMPLES (Client-side, server-side, Midrange and Mainframe)

In all likelihood, the employed software solutions will be a hybrid of commercially available products and custom applications developed with the UTHSCSA. An over-arching goal will be to leverage existing software capability where applicable, while deploying comprehensive solutions that are extensible, compliant, and fiscally sustainable while meeting all operational requirements.

PROPOSED HARDWARE EXAMPLES (Desktop, Laptop, Tablets, Servers, Mainframes, Printers and Monitors)

There will be a need for new hardware acquisition to support the creation and growth of repositories to include network, server, storage, and security appliances. As well, audio/visual, projection, end-user devices, integrated mobile carts, and biomedical devices will likely be required.

DEVELOPMENT COST AND OTHER COSTS

	Total Expenditures		9.5%		\$8,525,899	\$89,763,573		10.9%		\$11,571,203	\$106,387,785	

B. Assessment of Fiscal Year 2014 - 2015 Efforts to Meet HUB Procurement Goals

Attainment:

Agency exceeded one of the applicable procurement category goals in each fiscal year. UTHSCSA increased its outreach to the HUB and Small Business community by actively participating in a greater number of procurement events, supplier diversity programs, and with State and local organizations including local minority Chambers of Commerce. There was a 1.5% increase in HUB spend.

Applicability:

The "Heavy Construction" procurement category is not applicable to agency operations since the agency does not have any strategies or programs for heavy construction.

Factors Affecting Attainment:

In both fiscal years 2014 and 2015, several of the goals were not met due to the procurement needs of specialized commodities and services that are limited by lack of HUB certified suppliers and/or as related to health/research institutional requirements.

Building Construction and Special Trade Construction expenditures change significantly based on project funding and schedules, in addition to receiving "no response" to subcontracting opportunity bids.

"Good-Faith" Efforts:

Each fiscal year, good faith efforts are made to continue to include and expand HUB suppliers in all areas of procurement.

In May 2015, UT Health Science Center sponsored a new Mentor-Protégé agreement.

In both fiscal years 2014 and 2015, over 200 HUB, procurement and business related events were attended as an exhibitor, presenter, or served on planning committees.

USE OF HOMELAND SECURITY FUNDS

The purpose of this Department of Homeland Security contract is to provide specialized medical director services for the United States Border Patrol Search Trauma and Rescue Team (BORSTAR) and the designated Del Rio Sector certified EMS personnel in support of Customs and Border Protection (CBP) Operations. The award period began in late FY 2011 and is anticipated to end 8/23/2016. At this time, there are no awards anticipated for 2017 - 2019.

745 The University of Texas Health Science Center at San Antonio

Special Item: **1** **Regional Campus - Laredo (RCL)**

(1) Year Special Item: 2000
Original Appropriations: \$700,000

(2) Mission of Special Item:

UTHSCSA's Regional Campus in Laredo (RCL), authorized by the 76th Texas legislature (SB1288, Zaffirini/Cuellar), was developed to provide remote health professional education resources to meet community-defined health professional education and clinical training needs in the Laredo area. The D.D. Hachar Administrative building and the academic building are currently supporting a variety of health professional training programs in medical, dental, health professions and public health education. The goals are 1) establishment of graduate level health professions programs to increase the quality and numbers of health professionals in the region; 2) development of research programs that combine community-based participatory translational research with an active community advisory board to address the epidemic of diabetes and obesity and other major health concerns that impact the health and wellness of the region; 3) provision mini grants to motivated high school and college students interested in hands-on research; 4) engaging high school and college students in pipeline programs that will expand the number of qualified applicants eligible to enroll in graduate programs; 5) fostering active community participation in order to develop a healthier Laredo, better educated and committed to improving their quality of life; and 6) linking the RCL with other HSC campuses and South Texas academic institutions to enhance student opportunities through distance education technology.

(3) (a) Major Accomplishments to Date:

Since 2002, training programs have been initiated in the fields of medicine, dentistry, allied health, public health and research. The Respiratory Therapy Program (2002) graduated 14 therapists; 9 remained in the region. The Physician Assistant Program (2009) graduated 25 PAs (2009-13); 10 presently work in the Laredo area. At present there are 24 clinical training sites for PA students to support the didactic part of the program. The South Texas Diabetes and Obesity Project, operational in February 2014, has recruited over 200 participants and has initiated research collaborations with UTHSCSA faculty in Psychiatry, Cardiology, and Orthopedics. Public health training programs are available from certificate to master's level. A 4+1 Dual Informatics program has been initiated with TAMIU. Student pipeline programs offer training opportunities for students interested in health careers. A mini-Fellowship collaboration with Texas Academy of International and STEM Studies at TAMIU is offered every summer. The Dental Regional Campus programs offer dental residency and student training at local health care facilities, and dental hygiene students training opportunities. Continuing Ed programs are offered to local health professionals. The campus library offers trainees electronic access to the Briscoe Library in San Antonio and is open to the community. The regional campus collaborates with community partners on health conferences for professionals as well as the community at large.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

745 The University of Texas Health Science Center at San Antonio

*Funding support and associated accreditation requirements for the reestablishment of the Physician Assistant on-site program in Laredo is being sought. Student recruitment could begin as early as the fall of 2018.

*Explore the possibility of developing Medical student rotations at the Laredo Veterans Outpatient Clinic.

*In the planning phase are collaboration opportunities with Texas A&M International University and the School of Nursing to develop a psychiatric nurse practitioner master's level program and a Doctor of Nursing Practice degree. Ongoing discussion with the Laredo Community College, Associate Degree Nursing Department centers on recruiting students to the MSN degree program at UTHSCSA.

*Funding support and associated accreditation requirements to fund an on-site Dental Hygiene Program is being sought; student recruitment could begin as early as the fall of 2018.

*Efforts to sustain the South Texas Diabetes and Obesity Research Project will continue with special effort to expand collaborations with consultants and promote regional networking opportunities to share information and translate research outcomes into community interventions.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

Legislative funding at a sufficient level to accomplish the goals for the next two years is crucial. This campus needs to obtain the funding to expand programmatic needs at the Regional Campus for Laredo and surrounding region. The population growth in this area of Texas has far outgrown the resources and educational infrastructure available to serve the community and educate sufficient qualified and properly trained health care workforce both medical and dental. This remote health professional education campus was established by the University of Texas Health Science Center at San Antonio in 2002 to address a critical need for health care professionals and academic resources in this South Texas region. The development of health professional programs to increase opportunities for entry into health careers, improve health status and impact the quality of life of the region's residents has shown remarkable progress. However, continued funding support is essential in order to develop the academic infrastructure needed to support and enhance the academic programs in progress. The growing epidemic of obesity and diabetes in the adult border population represents a social, economic and health crisis that must be addressed. The enormous challenge facing this community requires the involvement and partnership of the present academic resources along with the community involvement, through education and research.

745 The University of Texas Health Science Center at San Antonio

Special Item: 2 Outreach Support - South Texas Programs

(1) Year Special Item: 2002
Original Appropriations: \$2,000,000

(2) Mission of Special Item:

The Formula Funding equation does not include funding for administrative costs required to provide infrastructure support to programs such as the Regional Campus in Laredo (RCL), the Podiatry Residency training program, the and the San Antonio Life Sciences Institute (SALSI) funded as Special Items. This required the UTHSCSA to subsidize administrative support for these programs through the General Revenue funding provided to core mission-based operations. These programs have made positive impacts on healthcare and education in San Antonio and the South Texas border regions. As these programs continue to flourish, the cost of providing core infrastructure support to Special Item programs in San Antonio and South Texas out-pace any infrastructure funding provided through the formula funding mechanism. The 77th Legislature recognized this formula funding deficiency and appropriated funding for Outreach Support to cover administrative and infrastructure costs for Special Item programs, such as the Regional Campus in Laredo. The distance between the main campus in San Antonio and the regional campus and satellite clinics in the border regions is predominately causing the need for separate infrastructure support for these established and growing programs and facilities in South Texas.

(3) (a) Major Accomplishments to Date:

With Special Item funding for this initiative first received in fiscal year 2002, UTHSCSA has been able to address critical administrative and infrastructure needs of the various educational, clinical, research and community outreach programs in San Antonio and South Texas for which the UTHSCSA has been named the fiscal agent.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Outreach Support funds will continue to be used to enhance the administrative and infrastructure needs of the Special Items in San Antonio and South Texas funded by the Legislature. With our request for enhanced funding, we seek to expand the mission of this Special Item to develop and maintain a patient data registry system making access to Electronic Health Records (EHR) of primary care facilities in South Texas available for research purposes and thereby developing a state-wide "medical informatics network" (a patient data warehouse) for large scale studies aimed at improving population health, health outcomes and new evidence-based health policies that can positively impact clinical practice. With consent, we can develop a Research Registry of individuals from South Texas willing to participate in future clinical studies and make their demographic, health and health history data available to a broader research community. Mobile Lab Clinics could be developed to provide healthcare services to populations in rural areas (e.g., measures of blood pressure, cholesterol, diabetes, body weight, etc.) and connect the EHR of these mobile units to the "network" to use for research projects.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding:

N

745 The University of Texas Health Science Center at San Antonio

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

This special item currently represents funding deficiencies for administrative support costs necessary to Special Item programs in San Antonio and South Texas border regions that are not allocated through the formula funding mechanism. Without the continued support of currently funding levels from the Texas State Legislature, the Core mission-based programs of the UTHSCSA will be impaired. UTHSCSA will continue to have institutional funding problems for core administrative and infrastructure support functions.

745 The University of Texas Health Science Center at San Antonio

Special Item: 3 **Podiatry Residency Training Program**

(1) Year Special Item: 2000
Original Appropriations: \$202,595

(2) Mission of Special Item:

The purpose of the Podiatry Residency Training Program is to improve the supply of podiatrists and expand outreach clinics for foot care to the population of South Texas to treat predominately diabetic induced foot ulcers and to teach state of the art treatment options that preclude amputation. This program participates in the Area Health Education Council and South Texas Border Initiative, and addresses the shortage of foot care physicians and the high incidence of diabetes and its complications in the South Texas/Border region area.

(3) (a) Major Accomplishments to Date:

The incidence of diabetes and its complications in South Texas is significantly higher than the national average. The residents participating in this program are providing foot care to diabetic and other patients in South Texas. The residents of this region are able to benefit from new treatment options that in many cases prevent amputation. In addition, the program is increasing the supply of podiatrists to the State, and to South Texas, in particular.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

It is essential that the training of podiatry residents be continued in order to increase the quality and level of foot care services to the diabetic population in South Texas. It is expected that some of the podiatry residents who provide services in the outreach clinics will remain in South Texas and open their practices there.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

None

745 The University of Texas Health Science Center at San Antonio

(9) Consequences of Not Funding:

Funding reductions would likely result in program termination. Without adequate foot care, diabetic patients are at risk for serious complications. It is essential that an adequate supply of podiatrists be available to serve the needs of the South Texas/Border Region.

745 The University of Texas Health Science Center at San Antonio

Special Item: 4 **Mycobacterial-Mycology Research Lab (MMRL)**

(1) Year Special Item: 2002
Original Appropriations: \$219,435

(2) Mission of Special Item:

During the 2000-2001 biennium, UTHSCSA assumed responsibility for operation of the Medical (Mycobacterial) Mycology Research Laboratory (MMRL) previously located at the Texas Center for Infectious Diseases in San Antonio. Personnel and operating funds have been assumed by the UTHSCSA, and continued funding to support this program is necessary to sustain the current level of activity. San Antonio is internationally recognized for its excellence in medical mycology. There are five principal investigators across multiple departments at UTHSCSA and in recent years, UTSA has grown from two mycologists to five. This collaboration has resulted in the creation of the San Antonio Center for Medical Mycology (SCMM), which is now in its 11th year and whose members possess expertise in a wide range of research areas from fungal clinical studies/diagnostics to basic science studies on a variety of fungal pathogens. SCMM is also affiliated with the UTHSCSA Fungus Testing Laboratory (FTL), a College of American Pathologists (CAP) and Clinical Laboratory Improvement Amendments (CLIA) certified international reference laboratory which provides diagnostic services for national and international entities, and trains mycologists from all over the world. This special item functions to significantly strengthen the development of joint collaborative research and training programs in conjunction with SCMM and our sister institution UTSA.

(3) (a) Major Accomplishments to Date:

The MMRL continues to make significant contributions in understanding how fungal pathogens lead to a range of important human diseases in Texas, nationally and internationally. These research efforts lead to the development of therapeutic interventions and diagnostic tools to improve human health. The focus on these diseases is of high priority as they remain epidemic/endemic in South Texas, Texas and globally. The MMRL has made major advances in delineating the fundamental mechanisms contributing to microbial disease progression and has developed multiple diagnostic platforms.

The success of MMRL is reflected by approximately 70 publications, many of which are in high-impact journals (see <http://www.ncbi.nlm.nih.gov/pubmed/?term=kadosh+d> and <http://www.ncbi.nlm.nih.gov/myncbi/browse/collection/42200330/?sort=date&direction=descending> for a complete listing). This program has also been critical in securing more than \$42 million in additional funding for the Kadosh and Wickes laboratories from a variety of agencies, including the NIH and DOD. Annual revenues from the FTL are approximately \$1 million dollars with about \$750,000 coming from fungal identification. The MMRL is also involved in mentoring both doctoral and masters trainees so that they can acquire expertise and contribute to the health and economic future of Texas. Many trainees have been highly successful, securing independent NIH fellowships and prestigious postdoctoral fellowships/faculty positions.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

745 The University of Texas Health Science Center at San Antonio

The research of this group is expected to continue providing an increased understanding of fungal pathogen populations and processes, thereby advancing development of epidemiologic and diagnostic methods, as well as new therapeutic approaches. MMRL investigators are among the best funded in the department, and have submitted 11 funding proposals this year alone. There are two avenues of commercial development of MMRL research that have been initiated in FY2016 involving a novel diagnostic platform (Hain, Lifesciences, Inc.) and the detection of fungal aerosols in buildings that are associated with asthma (Satorica, Inc.) These interests will continue to be developed in upcoming years.

The continued overall success of MMRL during the next 2 years will be reflected in a significant number of additional high-impact publications that will drive the medical mycology field forward and open up new avenues for future research.

We also expect major accomplishments in the training mission of MMRL in the next 2 years. The UTHSCSA Department of Microbiology and Immunology Infection & Immunity program expects to train a minimum of 50 Masters students and 15 PhD students over this time period, with at least 4-6 students specifically receiving training in medical mycology.

In order to facilitate these expected accomplishments, we would like to request a 20% increase in funds during the next biennium.

(4) Funding Source Prior to Receiving Special Item Funding:

National Institutes of Health, Center for Disease Control, California Health Care Foundation, UTHSCSA, Advanced Technology Program, San Antonio Area Foundation.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Interagency Agreement, Kleberg Foundation, Center for Disease Control, San Antonio Life Sciences Institute (SALSI), UTHSCSA local funds, THECB Advanced Technology Program (ATP), San Antonio Area Foundation (SAAF), Department of Defense (DOD), American Heart Association, American Cancer Society, National Institutes of Health, Department of Homeland Security, Voelcker Fund, numerous private companies.

(9) Consequences of Not Funding:

745 The University of Texas Health Science Center at San Antonio

Funding reductions would likely result in significant negative consequences including program termination, loss of essential personnel, a dramatic decline in new scientific and clinical research discoveries, an accompanying sharp decline in publications, decreased productivity and revenue and a significantly impaired ability to sustain the current revenue stream. More specifically, not funding this program would have a major negative impact on our ability to obtain additional extramural funding from a variety of agencies, including the National Institutes of Health and Department of Defense. Because the program plays a critical role in promoting collaborative interactions among members of the San Antonio Center for Medical Mycology and Fungus Testing Laboratory, these interactions would be severely disrupted in the event that funding is not provided. Finally, any interruption of funding for MMRL would significantly impair our ability to recruit and provide high-quality medical mycology training to both masters and doctoral students. The long-term consequences would lead to a permanent decline in medical mycology research with a significant negative impact on San Antonio's strong reputation in this area. Eventually, this decline, in combination with the other consequences of loss of funding, will severely impair the success of this research program and prevent the elimination of important human diseases in Texas as well as improvements in human health for its citizens.

745 The University of Texas Health Science Center at San Antonio

Special Item: 5 **San Antonio Life Sciences Institute (SALSI)**

(1) Year Special Item: 2010
Original Appropriations: \$2,000,000

(2) Mission of Special Item:

Generation of new knowledge, technology and innovation is a critical catalyst for the growth, development and well-being of our state. Recognizing this, Sen. Leticia Van de Putte and Rep. Robert Puente, supported by the Bexar County delegation, authored SB 728 and HB1716 during the 77th session to authorize the creation of the San Antonio Life Sciences Institute (SALSI). This institute was designed to: 1) facilitate the establishment of collaborative activities between public and private institutions that would lead to the overall enhancement of their research, teaching and service missions; 2) promote collaboration (joint doctoral programs, research projects) between these institutions; and 3) foster workforce development as well as innovation and commercialization initiatives to stimulate the growth of the biomedical and biotechnology industries in San Antonio and S. Tx. SALSI's goal is to develop synergies in research and education to exceed exponentially the efforts of the institutions if acting unilaterally. The response over the past 12 yrs from faculty, students and postdoctoral trainees to the SALSI's mission has been outstanding. The framework SALSI created has not only substantially and synergistically enhanced the relationship between the UTHSCSA and UTSA, but has strengthened research collaborations with area institutional research partners -Texas Biomedical Research Institute, Southwest Research Institute, San Antonio Military Health System.

(3) (a) Major Accomplishments to Date:

SALSI has been instrumental in clustering research expertise and collaboration among multi-disciplines to find solutions in Tx and beyond. Four units have been established leading research, team science, and healthcare policy. The Center for Innovative Drug Discovery has built top-tier programs across multiple fields, such as cancers, regenerative medicine, brain health, and infectious disease.. This core lab facility and the caliber of the faculty played a major role in the recruitment of Cytocentrics to San Antonio in 2015, whose affiliation and donated equipment has contributed to the expansion of high throughput drug screening capabilities. The SALSI awards to faculty spurred the field of regenerative medicine and stem cell research leading to RegenMed SA, designed to facilitate networking and scholarly interactions among individuals, institutions, centers, companies, and foundations in this area. The Vaccine Development Center of San Antonio, a multi-institutional collaboration among UTHSCSA, UTSA, Tx Biomedical Research Instit and SW Research Instit, sponsors an annual conference drawing national keynote speakers. The SALSI Academy serves as the hub for faculty development, graduate education programs, shared resources (core laboratories, software, etc.). The SALSI investment has enabled national exposure of research being done at UTHSCSA and UTSA, increased journal publications and extramural funding, and addressed workforce talent needs to support growing industries.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

745 The University of Texas Health Science Center at San Antonio

The funds requested will allow building upon the initiatives implemented in FY 16-17 to foster biomedical research, education and workforce development in areas of strategic interest for our region and the state of Texas. Specifically, funds will support lecture series and ad hoc symposia, including the SALSII Innovation Forum, The San Military Health & University Research Forum, RegenMedSA Conference, and the Drug Discovery Symposium, which will be crucial to promote new collaborations and team science approaches. In the area of research, SALSII funds will continue to support undergraduate internships, postdoctoral scholar awards, and offer seed grants to build strategic research teams addressing challenges in Brain Health, Data Analytics, Bioinformatics and Medical Informatics, as well as fund high-risk, high reward studies that have the potential to create new ground breaking research directions. The new BioInformatics Core, created with SALSII and CPRIT funding to address analytical needs in the area of Big Data, will be instrumental in recruiting and creating a critical cluster of nationally ranked scientists in areas that are becoming increasingly relevant to biomedicine, such as epidemiology, biostatistics, genomics and informatics, with the intent to build key human capital that can provide solutions to medical needs affecting the state of Texas, as well as research excellence and outstanding training for the next generation of biomedical scientists.

(4) Funding Source Prior to Receiving Special Item Funding:

Initial \$4.5M funding from UTHSCSA and UTSA (\$1M each) and UT System (\$2.5M); \$2M for the joint Bioinformatics/Computational Biology Program; \$1.25M of in kind funding.

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Extramural federal grant and contract awards.

(9) Consequences of Not Funding:

The 81st appropriated \$4M as Special Item funding to UTHSCSA for SALSII in Article XII from Federal Stimulus Funds received through ARRA, but funding was eliminated for the 2012-13 biennium and instead appropriated to our sister institution, UTSA, at a reduced level of \$1.47M. UTHSCSA and UTSA each requested \$4M during the 83rd but only \$1.47M for the 2014-15 biennium was again appropriated to UTSA, of which \$735,000 was allocated to the UTHSCSA. Enhanced funding of \$4M was requested and received for the 2016-17 biennium to support the recurring costs of SALSII and grow existing programs.

These new educational programs will be substantial to growing the biomedical community. With restored legislative funding, SALSII will continue to catalyze the highly successful collaborative research and education programs between UTSA and UTHSCSA.

745 The University of Texas Health Science Center at San Antonio

Special Item: 6 Barshop Institute for Aging Studies

(1) Year Special Item: 2014
Original Appropriations: \$2,000,000

(2) Mission of Special Item:

Providing quality health care for an increasing number of elderly citizens will become one of the major needs facing the public sector in this century because per capita expenditures for health care costs for the elderly are disproportionately high, especially the oldest old (e.g., individuals over 80 years of age). The incidence of cancer, Alzheimer's disease, cardiovascular disease, and diabetes will also increase as our population ages. Therefore, it is universally recognized that increased spending for research in aging is one of the most important strategies in reducing health-care costs by improving the health of the elderly and in enhancing their contributions to our work force and society. Research emanating from the Barshop Institute for Longevity and Aging Studies will improve the quality of life for the growing numbers of elderly people in Texas and the United States.

(3) (a) Major Accomplishments to Date:

Over the past 25 years, UTHSCSA has developed an internationally recognized program in aging research. UTHSCSA created the Barshop Institute for Longevity and Aging Studies in 1998 and has continued to recruit leaders in aging research from outstanding research institutions, establishing a strong base of basic research scientists in aging biology and age-related diseases. The Barshop recently recruited 6 outstanding new research faculty.

UTHSCSA ranked 2nd in National Institute on Aging (NIA) funding in 2015 and Barshop continues to maintain its stature and extramural funding level, whereby the Barshop became the only aging program in the country to be awarded the 3 most prestigious NIA-funded research centers:

*One of only 3 sites in the country receiving funding from the NIA for an Aging Interventions Testing Center, \$7,423,639 for 5 years.

*Awarded \$3,518,510 5-yr award from NIH for a Claude D. Pepper Older Americans Independence Center. The San Antonio Claude D. Pepper Center, awarded to the Barshop Institute.

*Awarded \$3,611,910 five year award from the NIA for a Nathan Shock Center of Excellence in the Biology of Aging (one of only 6 such centers nationwide). Our grant application was the only one to receive a perfect score.

*Intellectual property developed with NIA Funding by Barshop scientists supports licensing agreements with the private sector.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The funds requested will allow continued expansion of the aging research program at UTHSCSA, including opportunities for translational and clinical aging research to flourish and improve the quality of life for all Texans as they age. The Barshop Institute has created the South Texas Aging Registry & Repository (STARR). The primary goal of the STARR is to recruit a diverse group of community-dwelling adults who are potentially interested in participating in translational research and clinical demonstration studies, aimed at promoting healthy aging in Bexar County, the State of Texas, and ultimately in the US. The STARR also will serve as a data base of clinical, biochemical and genomic information that will support research in personalized medicine for extending healthy life expectancy. Funds will be needed to acquire, establish and maintain this data repository, as well as to expand and apply research in Military Health.

(4) Funding Source Prior to Receiving Special Item Funding:

The institute was created in 1998 and received \$393k in E&G funds and \$1.7M in Indirect Cost Recoveries from federal grants per year for operation prior to receiving special item funding.

745 The University of Texas Health Science Center at San Antonio

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

(8) Non-general Revenue Sources of Funding:

Extramural federal grant and contract awards.

(9) Consequences of Not Funding:

The UTHSCSA is in the enviable position of having the best Aging Research Institute in the world when research in aging is expected to increase significantly and lead to major discoveries in the aging processes and age-related diseases. Discoveries emanating from the Institute will provide the basis for improving the quality of life for the growing numbers of elderly in Texas and the US. In addition, the Institute will be at the forefront of training physicians in geriatric medicine. With the restructuring of the Geriatric Research, Education and Clinical Center (GRECC) of the VA, the creation of the Center for Healthy Aging, and the awarding of the Claude D. Pepper Older Americans Independence Center, major headway has been made towards the goal of interlacing of basic, translational and clinical research programs in aging.

745 The University of Texas Health Science Center at San Antonio

Special Item: 7 Institutional Enhancement

(1) Year Special Item: 2000
Original Appropriations: \$1,000,000

(2) Mission of Special Item:

Initial funding for this strategy was legislatively provided in the 2000-01 biennium to support the growth and expansion of existing and new programs both in South Texas and San Antonio locations, and to address salary competitiveness issues. Funds also flowing through this strategy, commonly referred to as Article III, Section 56 funding, represents the partial restoration of a 12.5% General Revenue budget reduction experienced during the 2004-05 biennium and enacted by the 78th Legislature for health-related higher education institutions. At the recommendation of the LBB, these funds were allocated to Institutional Enhancement in the 2006-07 biennium since the restoration was related to formula strategies and operations at the main campuses in San Antonio. This strategy also includes funds from the restructuring of the South Texas Professional Education special item strategy that was consolidated into the 2008-09 baseline requests for the RAHC, the Regional Campus-Laredo (RCL), and the main campuses in San Antonio during the 2008-09 biennium as authorized by the 80th Legislature. The portion of the STPE supporting the main campuses in San Antonio was allocated to Institutional Enhancement. This special item was legislatively provided because formula pools have been significantly reduced and are significantly underfunded to cover the actual costs of instruction, research and space support. These funds support the costs of the UTHSCSA's core missions.

(3) (a) Major Accomplishments to Date:

Core institutional missions and infrastructure functions have been preserved with these funds.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Continue to preserve core institutional missions and functions.

(4) Funding Source Prior to Receiving Special Item Funding:

E&G General Revenue

(5) Formula Funding:

N

(6) Startup Funding:

N

(7) Transition Funding:

N

745 The University of Texas Health Science Center at San Antonio

(8) Non-general Revenue Sources of Funding:

None

(9) Consequences of Not Funding:

This special item reflects restorative funding to Health-Related Institutions of Higher Education from Article III, Section 56 of the 78th Legislature as it pertained to an overall 12.5% General Revenue reduction. It also includes funds, as authorized by 80th Legislature, from the restructuring of the South Texas Professional Education special item strategy into the 2008-09 baseline requests for the Regional Academic Health Center, the Regional Campus in Laredo (LCE), and the main campuses in San Antonio. The portion of the STPE restructuring that supported the main campuses in San Antonio was allocated to Institutional Enhancement. As the workforce demands in the San Antonio area shift towards more skilled and highly trained employees, competition for available employees is felt institution-wide. As our involvement in outreach programs increases, greater demands are placed on the main campus for support functions. Because state General Revenue plays such a significant role in financing the core mission of our institution, it is important that it be maintained and not reduced. Without this General Revenue funding, educational, research, clinical training programs, and healthcare will negatively affect communities, practicing health professionals, and students. No alternative source of funding is available to support the institution's educational and clinical training programs in the South Texas and San Antonio locations.
