

Finding In-Network Providers

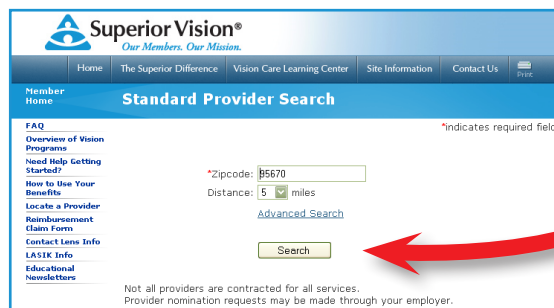

Unparalleled Provider Network

Superior Vision has one of the nations largest provider network, offering some 42,000 ophthalmologists and optometrists as well as opticians and optical chain locations. Finding the right eye care provider for you within our provider network is easy.

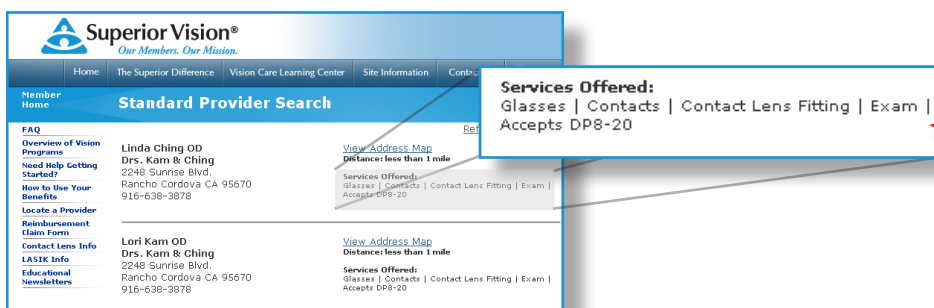

1. Login to www.superiorvision.com, and click on “Locate a Provider”.

2. Enter your zip code and select the mile radius in which you would like the search to take place. Click “Search”. You may also choose “Advanced Search” to find a specific provider by name, practice, or city.

3. Review the list of eye care providers, and choose your provider. Make sure to review the “services offered” description, as well as info regarding participation in the discount plan.

Not all providers at each office or optical store location are network providers, so make sure to verify provider participation before you schedule your appointment. We look forward to providing you with Superior service.
