

Versant Health Estimator Tool

An interactive resource that helps members prepare for an eye exam, make decisions at enrollment time, or maximize the benefits they already have.

Easy To Use and Open to All

- Provides users with a simple, intuitive way to get an **estimate** of their **approximate out-of-pocket costs** when visiting an in-network eye care provider, reducing financial surprises and demonstrating value
- Can be used by both potential and existing members – does not require personal information or an account

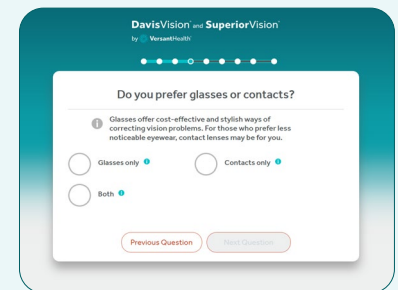

Guided Experience Focused on Member Education

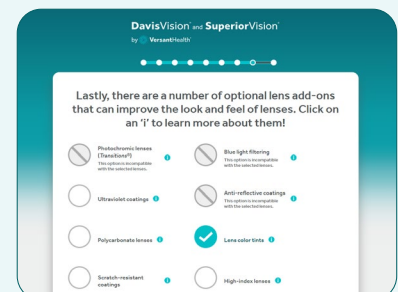

- Users are guided through a variety of anonymous, non-invasive questions about their eye care, from vision correction to eyewear preferences
- Questions are accompanied by helpful descriptions that boost vision benefits knowledge on topics such as retinal imaging and lens technology
