

Nagla Elerian, MS

Nagla Elerian is the Director of Population Health Strategic Initiatives at the Office of Health Affairs at UT System. Prior to joining the UT System, Nagla was the Director of the Center for Health Statistics at the Department of State Health Services. She has a Bachelor of Arts in Zoology and a Master of Science in Health Statistics with a minor in Geography. In 1995, Nagla established the first electronic Birth Defects registry in Texas. In 1998, she established an evaluation program for Medicaid managed care where she initiated many improvements to the Medicaid managed care data and reporting. In 2000, she joined the NorthSTAR program where she initiated many reporting mechanisms to allow the use and sharing of data for program improvements. In 2007, Nagla joined the Decision Support unit at the Mental Health and Substance Abuse, where she developed through a multi-stakeholder collaboration the risk assessment tools to allow the state to evaluate and manage mental health centers and substance abuse providers using financial, access, quality, and outcome indicators.
