### About UT System
Established by the Texas Constitution in 1876, The University of Texas System consists of eight academic and five health institutions. [The University of Texas System Administration](https://www.utsystem.edu) is based in Austin, TX and is responsible for the central management and coordination of the fourteen institutions.

### About the Office of the Chief Information Officer
The University of Texas System – Office of the Chief Information Officer provides technology support to The University of Texas System Administration and the Board of Regents Office including computer hardware support, conference equipment support and telephone support. The Office also collaborates with all 13 UT institutions to help advance our academic, health and research missions. Our strategic goals include: promoting IT funding, enhancing information security, shared services, providing IT cost avoidance / promoting IT savings and collaboration – interoperability.

### About the Internship
The University of Texas System Internship (UTSI) is a paid 10-week program that dovetails project-based work experience with a robust professional development program, mentoring and opportunities for self-reflection.

### More Information

#### Program Goals
- Contribute to UT student career development & success through real work experience
- Develop collaboration skills for a diverse, multi-generational workforce
- Offer hands-on experience in the student’s field/function of study
- Provide a safe learning environment for professional development

#### Learning Objectives
Students will have the opportunity to develop their skills in (1) public speaking, (2) business writing, (3) interpersonal communication & emotional intelligence, (4) project management, (5) networking and (6) information technology skills as well as (7) enhance their understanding of the field of higher education.

#### Position Description
Intern will support projects to enhance productivity of the UT System workforce. Projects may involve: API integrations, web application development, requirements specifications, documentation, and relational database structures and queries.
